By Willard Jones

JOHN HOWARD, affable grocery man down the street, was out last week for several days because of the effects of having a jaw tooth pulled.

Earl Crow, deliveryman at the store, was jibing John about his not being able to take a little pain. "Why, John," he said, "if you had had nine teeth pulled all at once like I did, they would have to take you to the cemetery."

"Why," John countered, "there are lots of fellows out in the cemetery now who didn't feel half as bad as I did."

MODERN DOCTORING has brought about quite a broad change in methods. From old fashioned home remedies that were used years ago we went to patent medicines, then to prescriptions, and now there is a "shot" for practically anything that is the matter with a human.

One patient, reportedly tired of the familiar spot that many of today's shots are being administered, came up with this enigma:

They "shot" me where the shooting's best.

I'm through with flu; I'm rid of it. The wonder drugs have passed the test.

I wonder now: How do I sit?

THEY ARE TELLING this on an Anson grocer who made his own bed recently:

The butcher had sold all of his poultry except one hen. In walked a woman who said she was entertaining at dinner and wanted a nice sized hen. The butcher reached into the ice barrel and brought forth his hen, flipped it on the scales and said, "This one will be \$1.85."

"Well," she said, "I really want ed a larger one."

The butcher, thinking fast, returned the hen to the ice barrel and stirred it around for a while, then brought it forth again and flopped it on the scales.

"This one," he said, "is \$1.95."

The woman considered briefly and then said, "I know what I'll take both of them."

AHAMILIN LAD, in one of his final efforts of the recent school term, turned in the following essay on geese:

"Geese is a low, heavy-set bird which is mostly meat and feathers. His head sits on one side and he sits on the other. Geese can't sing much on account of dampness of the moisture.

"Some geese when they get big has curly on their tails and is called ganders. Ganders don't have to sit and hatch but just eat and go swimming."

"If I were a goose, I'd rather be a gander!"

SMILES AND FROWNS reflect most of the time what is going on in one's head and heart. An unknown author pens these interesting lines:

If I knew the box where the smiles are kept,

No matter how large the key,

Or strong the bolt, I would try so hard

"Twould open, I know, for me.

Then over the land and the sea broadcast

I'd scatter the smile to play.

That children's faces might hold them fast,

For many and many a day.

If I knew a box that was large enough

To hold all the frowns I meet,

I would like to gather them every one

From nursery, school and street.

Then, folding and holding, I'd pack them in.

And, turning the monster key,

I'd hire a giant to drop the box

To the depths of the deep, deep sea!

LITTLE BENNY, it is reported in a local church bulletin, went to the grocery store with his mother. To her surprise he shyly refused the grocer's suggestion that he help himself to a handful of Indian nuts from a box on the counter.

"Oh, come now, I never heard of a boy who didn't like Indian nuts," said the grocer as he took a bag, scooped up a handful of nuts and handed them to Benny.

On the way home Benny's mother asked, "Tell me, son, why didn't you accept them in the first place?"

"Because his hand is bigger than mine," explained Benny.

THURSDAY, AND FIFTY-SEVEN

ISSUE 33

ALMOST GONE—Flood waters rushing over the spillway of Lake Texoma into Shawnee Creek near Denison washed out most of this railroad trestle. The trestle is on a spur track leading from the Denison Dam powerhouse to Yellow Jacket Boat Company, Inc. Engineers expected the bridge to give way. Waters above the big lake washed out the bridge of the Santa Fe Railway line running from San Angelo to Altus, Oklahoma, through Hamlin, and traffic over the bridge was rerouted for about 10 days.

Wheat Growers Will Ballot June 20 on Market Quotas

Rate of Parity Payments to Be Gauged by Vote

First Methodist Pastor Moves to New Hamlin Post

New pastor of the First Methodist Church in Hamlin, Rev. Edmund W. Robb, filled the pulpit at both services Sunday in his new pastorate.

The Robbs, consisting of the minister and wife and their four children, moved into the parsonage on Southwest Avenue. A last weekend as they moved from Amarillo, where he had held the pastorate of Forest Hills Methodist Church the past three years and four months. The children are Julia Ann, age nine; Eddie, six; Laurie Jean, four; and Sarah Jane, six months.

Robb is a native of Marshall. Following his graduation from Marshall High School he attended East Texas Baptist College at Marshall, Lon Morris College at Jacksonville and Centenary College at Shreveport, Louisiana.

During his pastorate at Amarillo his church received 453 members, the net increase being 280 to 610. The church built a new educational building and a \$35,000 parsonage. Previously he had been pastor at Quitaque, the Evangelical Methodist Church at Abilene and Marshall Grange Hall.

While at Amarillo young Robb was a member of the Kiwanis Club, on the executive committee of the Amarillo Ministerial Association and taught Bible in Palo Duro High School. He also served in the U. S. Navy for two and one-half years during World War II.

All eligible voters may cast their ballots at these locations between the hours of 8:00 a. m. and 7:00 p. m., it is announced.

Rowell pointed out that the recent marketing quota announcement marks the fifth successive year in which wheat quotas have been proclaimed. The proclamation of quotas must be made—in compliance with law—when the wheat supply is 20 per cent or more above normal. This year's supply is 36 per cent above normal.

Chairman Rowell emphasized that at least two-thirds of the producers voting in the referendum

will be eligible to participate. The program will begin at 9:00 a. m.

The sixth, seventh and eighth graders will participate from 9:00 to 10:30 a. m. The high school level students will attend from 10:30 to 12:00 noon.

Recreation will consist of volleyball, basketball, tennis, ping-pong and shuffle board. All participants will be expected to wear tennis shoes while on the gym floor, Andrews states.

The summer recreation program is designed to give supervised recreation and special athletic training for those who want or need it during the summer period, the coach announces.

Church of Christ at Tuxedo Sets Meeting

An eight-day gospel meeting will begin Sunday, June 16, at the Tuxedo Church of Christ, leaders of the congregation announce. The services will continue through Sunday, June 23.

M. J. Cunningham of Dallas will be the minister. Spiritual singing will also feature the services.

Services will be held each evening at 8:15 o'clock and each Sunday morning at 10:45. Everyone is invited to attend.

Two Hamlin Girls Go To Airlines School

Two Hamlin girls, both recent graduates of Hamlin High School, enrolled last week at an airlines training center at Omaha, Nebraska, for a 10-week course in airlines stewardess work.

The girls are Lavada Teichelman, daughter of Mr. and Mrs. Fred C. Teichelman, and Charlotte Jo Wallace, daughter of Mr. and Mrs. W. Wallace.

First Wheat of 1957 Brought in Saturday

Bids Called for Improvement of Highway 83 Sector

Further improvement in the Hamlin-to-Anson section of U. S. Highway 83 is projected in highway work of the state scheduled for bids next Monday and Tuesday by the Texas Highway Department, according to advice to The Herald from Austin.

The bids call for grading, structures and surfacing on shoulders of the 16.294 miles of highway from the Y in North Anson to the Santa Fe Railway tracks in South Hamlin.

The highway underwent major work two years ago, when the five-mile curve southeast of town was straightened and most of the bridges were widened, and 30 inches of paving were added to each side of the highway.

The new work will further widen several structures, then resurface the entire widened road to give more safety margin, declared District Highway Engineer Jake Roberts of Abilene.

Special work will be done in the Hamlin City limits south of the Santa Fe Railway on the project. Gutter type flanges will be built south from the railway tracks, and paving will be laid from gutter to gutter, making a six-lane highway for about two blocks.

4-H Junior Rodeo Set for June 28-29 At Roby Grounds

Plans are fast taking shape for staging the seventh annual Fisher County 4-H Club Junior Rodeo, slated Friday and Saturday, June 28 and 29, at Roby, according to James Norman, county agent, sponsor of the club groups.

Events are being arranged for both boys and girls in the varied contests, with several hundred dollars in cash and merchandise prizes being posted for winners.

Events include ribbon roping, ribbon roping, bull riding and bareback bronc riding for the boys. Girls' events include ribbon roping, poll vending, barrel race and saddle race.

Special added attraction of a wild pig race has been arranged for each performance, which will begin at 8:00 o'clock each evening.

A parade in downtown Roby will be staged Friday evening at 5:30 o'clock, it is announced.

Norman says proceeds from the rodeo will go to the 4-H Club fund that finances trips and other activities for the youths.

Hamlin swimming pool opened last Thursday—and swimmers of the territory were lined up for the event, reports B. V. Newberry, manager of the pool for the summer.

Pools hours at present have been set from 2:00 until 7:00 p. m. However, beginning next week the pool will be open until later depending on the number of swimmers who come in late. Newberry says. Punch tickets for family, children and adults are available at the pool.

Swimming lessons for those who desire them will be available beginning next week. Those interested will please contact the pool operators. Instructor will be Hollie Adams.

Morning sessions for adults will be arranged later if there is a need for such, Newberry says.

Good runs of swimmers have been making the pool every day since the opening, 147 entering on opening day last Thursday. Friday recorded 189 swimmers, Saturday 150, Sunday 140, and Monday 156.

In the Gypsum League there are two teams of youngsters from Sweetwater and one each from Roscoe and Hamlin. Managing the Hamlin team in this bracket are J. B. May and T. C. Anderson.

In the Double Mountain League

are teams from Sweetwater, Roscoe, Merkel and Hamlin. Managing Hamlin's team in this group are Rev. Henry C. Adair and Bill Adair.

A girl was born to Mr. and Mrs. Billy Charles Green on June 5. She was named Clara Mae.

Her weight was tabbed at seven pounds nine ounces.

A boy arrived for Mr. and Mrs. Stanley Acuna on June 8. Weight of the youngster was a heavy nine pounds five ounces. He said Pete would suit him for a name.

RECEIVES CONGRATULATIONS — General Ernest O. Thompson, former mayor of Amarillo, checks through the many greetings and congratulations received on his twenty-fifth anniversary as a member of the Texas Railroad Commission. Messages came from oil and gas leaders of the United States and other nations.

Golfers of Hamlin Do Fairly Well in Anson Tournament Over Week-End

Charles Cooley of Stamford very handily took the annual Anson invitation golf tournament Sunday afternoon with a 215 score for three rounds of the 71-par course at Anson Country Club. Jerry Holmes of Wichita Falls was third with 235 and Holly Tolles of Hamlin was fourth with 238.

In the third flight Joe League of Hamlin defeated Don Sealy in the first trip and also beat Joe White of Anson in the second. In the final League lost to Sam Baxter of Anson.

In the fourth flight Gene Knabe of Hamlin lost to W. L. Yaws of Fort Worth.

In the fifth flight Brose Spencer of Alton Wash in the first round, Bill Harbert of Hamlin lost of F. E. Frierson of Haskell, Wood Cowan lost to J. H. Wooldridge of Abilene, and Jim King defeated T. B. Michie of Wichita Falls. In the second round King defeated his brother-in-law, Harry Carmichael of Sweetwater. In the consolation Spence beat Bruton, and Harbert defeated Cowan. In the semi-finals Harbert beat Spencer. Then in the finals Harbert lost to James Liner of Anson.

In the sixth flight Wilson Branham of Hamlin defeated Erwin Brown of Haskell; Don Hymer of Hamlin defeated George Poe of Hamlin. In the second round Branham trimmed W. T. Denham of Lueders and Felix Martinez of Anson beat Hymer. In the finals Martinez defeated Branham.

Hamlin swimming pool opened last Thursday—and swimmers of the territory were lined up for the event, reports B. V. Newberry, manager of the pool for the summer.

Pools hours at present have been set from 2:00 until 7:00 p. m. However, beginning next week the pool will be open until later depending on the number of swimmers who come in late. Newberry says. Punch tickets for family, children and adults are available at the pool.

Swimming lessons for those who desire them will be available beginning next week. Those interested will please contact the pool operators. Instructor will be Hollie Adams.

Morning sessions for adults will be arranged later if there is a need for such, Newberry says.

Good runs of swimmers have been making the pool every day since the opening, 147 entering on opening day last Thursday. Friday recorded 189 swimmers, Saturday 150, Sunday 140, and Monday 156.

In the Gypsum League there are two teams of youngsters from Sweetwater and one each from Roscoe and Hamlin. Managing the Hamlin team in this bracket are J. B. May and T. C. Anderson.

In the Double Mountain League

Her weight was tabbed at seven pounds nine ounces.

A boy arrived for Mr. and Mrs. Stanley Acuna on June 8. Weight of the youngster was a heavy nine pounds five ounces. He said Pete would suit him for a name.

Local games are being played at the Pied Piper ball park, the games being played on alternate nights with the Pony League.

Grain So Far Is Weighing Light, Declare Buyers

Wheat and oats of the new 1957 crop were coming into Hamlin this week at a fair clip, following several days of fair weather that permitted combines to get into the field.

First load of 1957 wheat for the Hamlin territory was brought in Saturday by John R. Cook of the southern part of the county. This was nearly a month later than the first wheat last year, which was brought in by J. T. Smith and son of southwest of town on May 17.

Cook's first wheat graded No. 2 quality and weighed 58 pounds to the bushel. It was purchased by F. B. Moore & Son Grain Company.

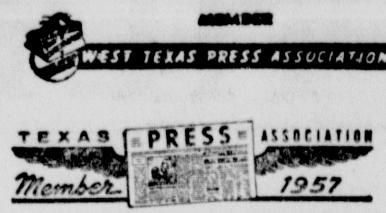

Both wheat and oats, although looking good in the fields due to the abundant rains of the past several weeks, is not turning out quite as well in quality as was expected by most growers. Probably the later grain will be improved in quality, it is indicated.

MAKING ACREAGE COUNT WITH PRODUCTION

Farming in the Hamlin territory, like every other business and enterprise, is more complicated and expansive—with more items of expense of maintenance and operation—than it was several years ago. The farmer has to maneuver every conceivable method of economy, short-cuts and production improvements in order to show a profit on his operations.

And the farmer who does not put into practice modern techniques, use up-to-date equipment and streamline his whole farm plan has a hard time coming out on the long end of things at the end of the crop year. His predicament, we say again, is no different from the average business man, who likewise has to seek cost-cutting facilities while offering more service on smaller margins of profit.

But how can a farmer change his methods when he has the same land to farm he had 15 years ago? How can he show a profit when it looks like everything he has to sell is down in price while everything he has to buy has skyrocketed to new highs? Those are tough questions that will not be answered by simple answers. Nor will the answers be easy to carry out.

The over-all answer to the farmer's problem is that he just must produce more on what acreage he has at less cost.

Ways to produce more are a conglomera-

tion of improved methods. Enriching the soil by water conservation, fertilizers and plowed under legumes are vital nowadays; planting of better seeds to insure better stands and higher quality products is a good practice; improved cultivation techniques, plus control of weeds and grasses at critical stages in the growth of crops will pay off; use of insecticides and other poisons that will assure higher yields are practical modern practices that up production; harvesting rightly timed with proper equipment will help further to get all the production in its prime condition.

Farming, to be successful, cannot be done on a slip-shod, hap-hazard program any more if it is to show a profit. Grandad's methods may have been all right in his day, but certainly he did not have the competition, the expenses nor the high priced land that today's farmer must face before he really gets started.

To be sure, there is still money to be made in farming. But it requires initiative, planning and spizzerinkum to wrest the living from the soil—just as it requires these same principles to make a living in any field today.

Farming has a bright future for those who will determine to modernize their thinking as well as their equipment. Drought has put many a farmer "behind the eight ball," but will and mind will overcome the recent set-backs!

RECALLING Other Years

Being news items taken from old files of Your Home - Town Newspaper, The Herald.

TWENTY YEARS AGO.

Among news items of interest in the Hamlin community 20 years ago were the following, reprinted from the issue of The Hamlin Herald dated June 11, 1937:

Janie Mae Johnson returned home Wednesday from Sioux City, South Dakota, where she has been teaching in the public schools.

Born to Mr. and Mrs. Clarence Bailey last Tuesday a fine new son, Warren Nobles has completed his sophomore year at Texas Tech, and is here to spend the summer with his mother, Mrs. Vera Nobles.

Mr. and Mrs. M. E. Witt of Lubbock were here this week to visit their son, I. R. Witt, and family. Mr. Witt is head of the chemistry department of Lubbock High School, and will be remembered as a teacher of the first school in Hamlin years ago.

TEN YEARS AGO.

Reviewing the past, The Herald reproduces the following items of interest in the community 10 years ago, taken from the issue of The Herald dated June 13, 1947:

Mr. and Mrs. R. H. Gardner have announced the approaching marriage of their daughter, Frances, to M. R. Young of Ralls. The wedding date has been set for June 21.

Marguerite Nobles, daughter of Mrs. Eskin Nobles, became the bride of Edward Milton Raley at the First Baptist Church Saturday morning.

Jimmy Spencer, son of Mr. and Mrs. A. Spencer, was honored at a birthday party Sunday.

Koleta Clements, bride-elect of Glenis Galen Costin of Abilene, was honored at a gift tea Wednesday afternoon in the home of Mrs. Joe L. Culbertson.

Mr. and Mrs. H. E. Weir and son, Gene, and daughter, Jerry Lynn, of Troy spent the weekend with his brother, Dr. W. D. Weir, and family.

Joe Hargrove has gone to Denton to enter college.

Bettye Sellers has entered a business school in Fort Worth.

Mr. and Mrs. Charles Connally of Sweetwater are announcing the birth of a son on May 19 in a Sweetwater hospital. The young man has been named Charles Edward Jr.

FIVE YEARS AGO.

Going-on in the Hamlin community five years ago included the following, reproduced from the issue of The Hamlin Herald dated June 13, 1952:

I. R. Hutchison, Hamlin school superintendent, was elected new district governor of Lions Clubs at the district convention Monday at Brownwood, barely nosing out a Fort Worth man.

Neighbors of E. E. Johnson, farmer in the Carlton community southeast of Hamlin, worked his farm this week as a gesture of friendship for the man, who recently suffered a severe heart attack.

Rev. Victor Ortiz, 57-year-old pastor of the Mexican Baptist Mission Church in Hamlin, this week received his degree from Hardin-Simmons University at Abilene as the climax of six years of schooling at H-SU. Deciding late in life to become a minister, he determined not to let family obligations and other difficulties keep him from getting a good education. He will go to the Golden Gate Baptist Seminary at Berkeley, California, for further training.

(1) Manual and routine labor will gradually become obsolete.

(2) Those who cannot readily learn new skills will be kept on at reduced hours, but with the same take-home pay. This will boost the do-it-yourself industries.

ONE YEAR AGO.

As we recall other years in the Hamlin territory, we reprint the following items of interest taken from the issue of The Herald dated June 14, 1956:

Hamlin's new swimming pool at the City Park is proving popular these days. Swimming classes are being conducted by Hollis Adams and Dutch Encke of Anson.

The Skyrockets, colored girls' baseball team, have won the first six games they have played so far.

Eighteen Hamlin Boy Scouts and Scoutmaster Weldon Johnson are this week attending the annual district Boy Scout camp at Camp Tonkawa near Buffalo Gap.

A new curb and gutter project is being worked out by members of the City Council. A tentative price of 85 cents per foot has been set for the work that will be done by a crew from the city maintenance department.

THE HAMLIN HERALD, HAMLIN, JONES COUNTY, TEXAS

Babson Says Training in Selling Will Help to Relieve Over-Production

Skyrocketing labor costs have forced employers to resort to unprecedented technological research, it is pointed out by Roger Babson, famous analyst and economist, who is a regular columnist for The Herald. This article for the week continues: This research is teach-

(3) Only the serious and intelligent employees will get raises. There will be no limit on salaries for those with the necessary character, brains, initiative and loyalty.

(4) Our great problem will not be to raise crops, build homes or manufacture goods—but to get people to buy. Hence, instead of subsidizing farmers, we may eventually subsidize merchants and salesmen.

(5) I advise young men to become expert machinists instead of lawyers, trained outside salesmen instead of inside pencil pushers, and after graduation to attend night school to prepare for the new age.

SEEKING HIS KILL.

The tired engineer had had it. Everything during his run had gone wrong. To top it off, a cow strolled onto the tracks and his train had killed it.

Dutifully the engineer climbed down from his cab and searched out the cow's owner.

"You mean to tell me my cow was on the tracks?" the farmer exclaimed.

"No," the tired, disgusted engineer replied. "I chased it across three fields."

VISION CLOGGED.

The family had been away with father for a year while he did further study at another university. Home and acreage looked very wonderful to the youngest after living in an apartment, newly built and treeless.

Looking out of the dining room window with a look of deep satisfaction, she whispered, "My, our window's stuffed with trees!"

County Agent Says Treated Seed Help To Prevent Diseases

Cotton and maize planting will be in full swing by this week-end if the rain holds off, declared Bill Lehmburg, county agent, this week.

Recommended varieties of cotton are Stampede No. Lockett 140, Paymaster 54, Western Stormproof and Northern Star. Many acres will be planted to the old stand-by Lankart.

Maize varieties that hold the most promise are hybrids RS 160 and Texas 620 and non-hybrid Redbine 38.

All seed should be treated to prevent seedling diseases, declares Lehmburg.

Further information can be obtained at your county agent's office at Anson.

KNEW HIS PURPOSE.

A man walked into a grocery store in a small town.

"Yes, sir," the obliging clerk said, "may I help you?"

"I want to buy all your overripe fruit and vegetables and rotten eggs," replied the man.

"Ha, ha!" the clerk laughed.

"You must be going to see the comedian at the theater."

"Not so loud," demanded the man. "I am the comedian."

The first set of boxing rules and the first set of boxing gloves were made by Jack Broughton in 1743.

Effectiveness of Recent Rains in Area Has Been Governed by Shape of Soil

How effective have the April and May rains been? Penetration tests made after the recent rains provide the answer, declare officials of the California Creek Soil Conservation District. These tests once again proved that soil condition and cover must be good.

The county received an average of 12.25 inches of rain from April through May 21. Root-plowed pasture on a mixed land range site was wet down seven feet, whereas non-root-plowed bare pasture was wet down only two feet. The root-plowed pasture stored the entire 12.25 inches of rainfall. The non-root-plowed pasture stored 3.5 inches of moisture with a total run-off of 8.75 inches. Terraced mixed land was wet down three to four feet. On non-terraced mixed land the soil was wet 2.5 to three feet deep.

The bare red soil on a hard land range site was wet down one foot. This represented two inches of moisture stored with a total run-off of 10.25 inches. On red soil under a good cover moisture penetrated to a depth of 3.5 feet. This was representative of seven inches of moisture and 5.25 inches lost due to run-off. Terraced red soil checked outside terrace channels was wet down 18 to 24 inches. Four inches of moisture was stored. 8.25 ran off. Non-terraced red soil was wet 12 to 15 inches deep. Only two inches of moisture was

WINS FIDDLE CONTEST—Covered with a raincoat to protect him from a drenching thunderstorm, Garland Spurgeon Rose, 68, of an Antonio fiddles his way to the championship of the over-65 group at the annual Old Fiddlers Reunion at Athens.

Plans Shaping for Fisher County Rodeo And Fair in August

Plans were put underway several days ago for the twelfth annual Fisher County Rodeo and Fair, scheduled at Roby this year on Thursday, Friday and Saturday, August 22, 23 and 24, officials of the event announced.

Ed Carter has been named general director of the annual show. The fair will feature animal, crop and culinary exhibits at the fair ground, located in Southwest Roby.

Glen Webb, Roby rancher, has been renamed rodeo director. He says Goat Mayo of Petrolia will furnish the stock again this year. More details about the fair and rodeo will be carried in The Herald in subsequent issues.

RUNNING INTO MONEY.

Customer—"The big dog is \$20, the little dog is \$75, and the tiny one is \$200. Is that right?"

Clerk—"That's right, sir."

Customer—"How much will it cost me not to buy any dog at all?"

Defective Tires and Brakes Account For Many Deaths and Injuries on Road

Defective tires and brakes can be killers, the National Safety Council warned motorists today.

Tires that are cut and worn thin invite a motor vehicle accident, the council said. In time of stress—especially when going around curves—they may fail.

Blow-outs or unsafe tires are factors in one of every 100 fatal accidents and in one of every 100 accidents.

To lessen the chance of blow-outs, the council advised motorists to:

1. Rotate tires regularly.
2. Have tires checked by competent garagemen.
3. Watch for tell-tail signs—frequent loss of air, for example—of tire failure.
4. Replace worn tires periodically.

Brake failures are reported in two of every 100 accidents and in two of every 100 fatal accidents.

So-called long brakes—brakes that must be pushed near the

floor-board before they work—will cause trouble when quick stops are necessary. Brakes that require frequent pumping are dangerous, too, the council said.

Brakes that can stop a car traveling 20 miles an hour in a distance of 17 or 18 feet are rated excellent.

Average brakes can stop a car at 20 miles an hour within 21 feet. At the same speed, most cars can stop within 25 feet.

Powerful brakes, the council said, are safety factors, of course, but they can be dangerous, too, if they are used to stop a vehicle with complete suddenness.

Passengers may slide off seats and be injured. Children, in particular, may be hurt because their legs are too short for them to brace against foot rests.

Sudden stops of trucks may result in a load shift and cause overturning.

Wheat Growers Will Vote June 20 on New Crop Marketing Quotas for 1958

must approve quotas before they can be put in effect. He also stated that individual farm quotas generally will be the actual production from the farm's wheat acreage allotment.

Should quotas be approved, Rowell explains, Jones County wheat growers who comply with their allotments will be eligible for price support on their entire production. Wheat growers who exceed their farm acreage allotments will be subject to marketing quota penalties on their excess wheat if they have more than 15 acres of wheat for harvest. The penalty will be 45 per cent on the May 1, 1958, parity price. Growers who knowingly exceed their allotments will also be ineligible for price support.

If quotas are not approved, there will be no restrictions on wheat marketing. Allotments will remain in effect, however, and wheat farmers who comply with their allotments will be eligible for price supports at 50 per cent of the parity price, as required by law when quotas are disapproved.

The 1958 national wheat allotment of 55,000,000 acres is the minimum fixed by law and is the same as last year. It is expected to yield 800,000,000 bushels, after allowance for acreage placed in the soil bank program. State, county and farm allotments are based on the national allotment.

The 1958 allotment for Texas comes to 4,164,302 acres, which is slightly more than this year's allotment. If the national allotment had been figured on the basis of the law's supply formula instead of upon a minimum national allotment, the 1958 allotment would have amounted to only 23,100,000 acres.

Growers in commercial wheat states who will have more than 15 acres of wheat for harvest as grain in 1958 come under the regulation of quotas and will be eligible to vote in the referendum. States having wheat allotments of 25,000 acres or less have been designated "non-commercial" wheat states, and allotments and market quotas do not apply therein.

Nothing is particularly hard if you divide it into small jobs.—Henry Ford.

The Herald's Page for Women

Women of Faith Methodist Church Host Sub-District Session for WSCS

Faith Methodist Church in Hamlin was host to a meeting of the Sub-District No. 3 of the Women's Society of Christian Service of the Stamford District Tuesday. Mrs. L. H. McBride, sub-district chairman, presided. Theme of the day was "Study to Show Thyself Approved."

Twelve district officers were present for the day: Mrs. A. A. Hackley of Hamlin, president; Mrs. P. F. Weimer of Weimer, vice president; Mrs. R. A. Shaver Jr. of Rochester, treasurer; Mrs. C. J. Robinson of Haskell, recording secretary; Mrs. D. H. Persons of Haskell, chairman of the district research committee; Mrs. H. H. Hines of Rule, district president of the Wesleyan Service Guild; and the secretaries of the following WSCS work: Mrs. H. C.

Adair of Hamlin, children's work; Mrs. J. S. Shannon of Munday, missionary education and service; Mrs. Bert Johnson of Lueders, supply work; Mrs. A. G. Dement of Haskell, spiritual life; Mrs. Howard Owens of Tuxedo, Christian social relations; and Mrs. Arthur McGaughy of Vera, literature and public relations.

Four towns answered roll call with a total of 45 present.

Mrs. Buren Carlton of Hamlin brought the morning devotional on "If I Would Follow Christ."

Workshops were held with district officers giving instructions to local officers.

Mrs. A. A. Hackley of Hamlin made a talk on "The Relationship of the WSCS to the Board of Missions."

After lunch, served by the Faith WSCS, a business session was held in which Mrs. Gerald Renfro of Faith Methodist Church was elected a member of the district research committee, filling the place of Mrs. N. L. Crowley.

Rotan will be host to the next sub-district meeting, it was announced.

Following the business, Rev. H. C. Adair and Dr. J. W. McCrary sang as a duet "All I Have Given to Jesus," accompanied by Mrs. J. W. McCrary at the organ.

Rev. Adair brought the closing devotional on "Study to Show Thyself Approved, Acceptable to God."

Mrs. J. W. McCrary was accompanist and Mrs. B. F. Ford was song leader for the day. Mrs. N. L. Crowley is president of the Faith Methodist WSCS.

Hamlin Women to Go To State B&PW Meet

State convention of Business and Professional Women's Club, meeting Friday, Saturday and Sunday at Lubbock, will be attended by several delegates and alternates from the Hamlin club.

Going for the three-day meet will be Mrs. Terry Haught, president; Mrs. Tom Teague, first vice president, and Lennie Greenway. Mrs. Kenneth Riddle, Mrs. R. D. Moore and Mrs. Zelma Hulse will serve as alternates.

Mrs. E. M. Wilson also will attend as director of the seventh district of B&PW Clubs.

In 1947 John Cobb of London became the first person to travel more than 400 miles per hour on land.

Jack Drummond to Marry Waco Girl in Early July Rituals

A romance started while the two principals were students at Tarleton State College at Stephenville will be climaxed by an early July marriage, it was revealed this week.

The engagement and approaching marriage of Jack Drummond of Hamlin to Dixie Fulp of Waco is being announced by her parents, Dr. and Mrs. Loy Fulp of Waco.

Jack is the son of Mr. and Mrs. G. W. Drummond of Hamlin. He is a graduate of Hamlin High School, where he was a member of the Pied Piper football team and was active in Future Farmers of America work. He is a 1957 graduate of Tarleton State College, where he was outstanding in military drill. Young Drummond is employed by the Celotex Corporation plant at Hamlin.

Miss Fulp is a 1956 graduate of Crawford High School, and she also attended Tarleton State College. The wedding will be solemnized on Saturday, July 6, at 6:30 p. m. in the First Methodist Church at Crawford, former home of the Fulps.

Milk Helps Provide Necessary Calcium For Bone Building

Every day should be dairy day, reminds Mary Y. Newberry, county home demonstration agent, as she emphasizes the importance of milk in the diet. Regardless of age, the food value of milk is needed daily by everyone for good health.

Children need milk to build bones—older people, too, need milk for bones. Research has shown that one of the greatest problems of after middle age is maintenance of good strong bones. Minerals in milk, especially calcium, help solve this problem. Putting calcium in bones is like putting money in a bank account. If it is always drawn out without putting more in, the calcium in "bone account" disappears and bones are liable to break when you reach 65 or 70. In other words, you never outgrow your need for milk.

Foods prepared with milk and dairy products add variety, too. If you don't want to get all of your daily supply as a beverage, try putting some milk into a cream soup, custard or ice cream. Use milk to help balance the budget as well as the diet. No other food gives as much food value per dollar as milk.

In 1947 John Cobb of London became the first person to travel more than 400 miles per hour on land.

Future Homemakers of Hamlin Again Play Host to Girls of Area at Camp

Twenty girls and their sponsors attended a two-day camp Monday and Tuesday at Buffalo Gap, southwest of Abilene. An annual affair, the event has been hosted by the Hamlin High School chapter of Future Homemakers for the past several years.

Girls attended from Vernon, Megargel, Olney, Avoca, Stamford, Rotan, Knox City, Rochester, Rule, Lockett and Hamlin.

The camp is one of pleasure and leadership training, declare Mrs. James E. Simmons and Mrs. Joe Wayne Carter, sponsors of the FHA girls. The Hamlin chapter girls presented a vespers service one evening. One period was devoted to FHA work. Each girl made a felt book cover during a craft period. A prize was awarded to the girl who made the most attractive cover. Elizabeth Norton presented a discussion on "Being Charming" Tuesday afternoon.

Joe Cowan and Lanier Foster acted as lifeguards. Cooks were Mrs. Cecil Brown and Mrs. Ed Rodgers.

Those attending from Hamlin were Glenda Williams, Glenda Wright, Sara Fomby, Carolyn Nunnally, Billie Dominey, Judith Ford, Rebecca Ferguson, Gloria Rodgers, Judy Teichelman, Louise Lakey, Jo Ann Hallum, Martha Gage, Ann Maberry, Libby Johnson, Kay Millorn, Ann Richey.

For millions who suffer torture of cramps and nervous tension every month, an amazing new tablet has been developed that brings greater relief than aspirin!

Relief for 3 out of 4 Tested! For 3 out of 4 women tested by doctors, pains and cramps were stopped or strikingly relieved. This new discovery offers more relief than aspirin because it is not just a drug ingredient but a unique combination of medicines that act on the cause of distress.

Called "Lydia Pinkham's Tablets," they're at all drugstores without prescription. Try Lydia Pinkham's Tablets! See if you don't escape much irritability, discomfort—both before and during your period! (Also liquid Lydia Pinkham's Vegetable Compound.)

SUNDAY-MONDAY-TUESDAY

Ruth Sunday School Class in Monthly Business-Social Meet

Members of the Ruth Sunday School class of the North Central Avenue Baptist Church met last Thursday afternoon in the home of Mrs. Melvin Waggoner for their business and social meeting for the month of June.

Mrs. Joe Fudge, president, had charge of the business session. Opening prayer was given by Mrs. A. G. Anderson. The devotional was brought by Mrs. Frank Martin.

Secret pals were revealed by the members and new names were drawn for another period.

The group presented a gift to Mrs. Waggoner in appreciation of her work in painting the Sunday School classroom. Closing prayer was said by Mrs. V. Madden.

Games were played, and refreshments were served to 13 members and one guest.

Next meeting of the group will be July 11 at 2:00 p. m. in the home of Mrs. Sid Clay.

Refrigeration Is Vital For Egg Freshness

Refrigeration helps insure good quality in your eggs. So make sure they are kept in a dairy case at the store where you purchase them. Then don't leave them in a hot car while doing other errands or in a hot kitchen while sorting over the rest of your groceries.

Put them in your refrigerator as soon as possible. Store them large end up and preferably in a covered container away from strong smelling foods. Remove from the refrigerator only the number needed at one time.

Clothing Classes for Adults Slated at HHS

A free class in clothing construction is being offered for adults beginning Tuesday, June 18, at 3:00 p. m. in the Hamlin High School homemaking department. Classes will be Tuesdays through Fridays for a month.

The department has recently had an air conditioner installed, so the classes will be comfortable.

Mrs. Joe Wayne Carter and Mrs. James E. Simmons, homemaking teachers, will be the instructors.

The four Queens in a pack of cards represent Cleopatra, Queen Esther, Queen of Sheba and Boadicea.

These Milk Shakes Are Good for Dieters

Youthful dieters who are bent on keeping their weight as well as their complexions presentable would do well to drink more of the milk beverages that are high in nutrients but not overloaded with calories.

With the aid of a milk shake mix, one of the teens' favorite drinks, creamy chocolate shakes, can be made at home that contain less than 90 calories in an eight-ounce glass.

To make the shake you just pour one cup of cold skimmed milk into a shaker. Add two ice cubes and one package of make-a-shake mix. Cover and shake container energetically for 30 seconds.

Senator Johnson Says Foreign Aid Bill Being Given Careful Consideration

The administration's foreign aid bill will come to the floor of the Senate soon, points out U. S. Senator Lyndon B. Johnson, in his weekly news letter, which continues: The entire record of the foreign aid program should be studied carefully in order to find the best course for our country.

Two types of assistance have been included in our economic aid programs since the end of World War II: Direct grants in which we simply give another country money or goods; loans for which we expect repayment.

Personally, I believe that nations are like people. At times a direct grant may be necessary to someone who is suffering and in distress. But, generally speaking, people who are in trouble prefer a loan that helps them get back on their feet.

CUSTOMARY FUNCTION.

An airliner, flying leisurely along, had almost reached its destination when serious trouble suddenly developed. Two engines burst into flame; a heavy fog eliminated all visibility; and to make matters worse the co-pilot had blacked out. Those aboard were numb with terror—all, that is, except one, a minister, who took it upon himself to comfort the others.

"Let us all kneel and pray," he said warmly. "It will calm our hearts and minds."

After all had kneeled, however, one old gent still remained standing.

"Why aren't you praying like the rest of us?" asked the minister.

"Because," came the answer, "I don't know how."

"In that case," advised the minister, "just do something religious."

All eyes following him, the old gent snatched his hat, bowed reverently and, proceeding down the aisle, began taking up a collection.

Jacobean furniture was named in honor of King James I of England.

Lions Club Minstrel Nets \$165 for Projects

Proceeds of the negro minstrel presented three weeks ago by the Hamlin Lions Club totaled about \$165, it was announced at the Tuesday noon luncheon meeting of the club. A few more tickets are to be reported, Secretary George Campbell reported.

The proceeds go to the club's project fund, including sending of President-Elect Willard Jones to Lions International convention at San Francisco, California, next week.

A pirogue is a canoe made from a log or a tree.

YOUNG SPROUT.

Grandparents Baur had planted three young trees according to size to commemorate the births of their three grandchildren, Andrew, Heidi and Pamela.

Two of the young saplings sprouted leaves sooner than the smallest one. The older children helped tend the trees.

One day Heidi, six, awoke early and ran into the garden. Rushing back, she shouted excitedly, "Mommy, Daddy, Pamela has leaves!"

VISITS IN ARIZONA.

Mrs. Earl Johnson left Friday for Prescott, Arizona, where she is visiting with her brother, Ralph Gillis, and family.

Quick Dessert Treat Made Very Simply

Make a dessert treat by filling a baked nine-inch pie shell (either pastry or graham cracker) with a quart of vanilla ice cream. Top with minted pineapple sauce.

To make sauce, combine one (nine-ounce) can of pineapple tidbits, one-half cup light corn syrup, one-fourth teaspoon of mint extract and two drops of green food coloring. Blend well. Chill. Makes one and one-half cups of sauce.

The Cathedral of St. John the Divine in New York City and began in 1892 but is not yet completed.

MODERN YOUNGSTER.

A little boy, on his way to kindergarten, tripped and fell on the sidewalk.

A kind, old lady, who had seen him fall, quickly rushed over to help him.

"No, there, little man, you must be a brave little fellow and not cry."

"Cry, my foot?" the boy shouted. "My name is Bembridge. We'll sue!"

ATTENDING TECH.

Jay Cunningham and George Huling, graduates of Hamlin High School last month, last week enrolled for the summer semester at Texas Technological College at Lubbock.

TRAVEL TIPS

June's here. Summer is in the air. Now's the time for fishing trips, honeymoons, week-end jaunts and full-fledged vacations.

Summer also is the time when Long Distance service can come in extra handy.

Just a call or two to relatives or friends, to the hotel or fishing lodge, and all the details of your vacation are quickly worked out.

Traveling by car, you make the most of each day's driving conditions by calling ahead for reservations. And you can change your time table as you go along.

Long Distance helps in arranging those spur-of-the-moment week-end jaunts, too. A couple of calls, a few

Using Caution in Lifting May Avoid Serious and Painful Injuries to Back

Paper clips and putting around a yard have something in common—they both can cause back injuries.

It's often an apparently harmless object that is an injury deal—wet leaves on a sidewalk or paper clips on an office floor, according to the National Safety Council.

And, of course, back injuries also are caused by lifting objects that are too heavy, the council pointed out.

With the advent now of warm weather, the council noted, many men (and women, too) who practice job safety throw caution to the winds when they do yard work or repair projects at home. The result is a familiar complaint, "Oh, my aching back!"

How can a person tell if a load's too heavy for him? The council said these points should be considered:

1. How is the lifter built—stilt or sturdy?
2. What type of work is he used to?
3. Is the load bulky or compact?

"A back injury, whether it's suf-

Former Stonewall Commissioner Passes at Hamlin

Several Hamlin area people Sunday afternoon attended funeral rites for E. Galloway, 62-year-old former county commissioner and resident for 49 years of Stonewall, who died early Saturday morning in the Hamlin Memorial Hospital following an illness of several months.

Funeral was held Sunday afternoon at the Aspermont First Baptist Church, with Rev. Frank Foster, pastor, officiating, assisted by Rev. Wodrow McHugh, pastor of North Central Avenue Baptist Church of Hamlin.

Burial was in Aspermont Cemetery under direction of Springer Funeral Home. Pallbearers were J. T. Anderson, Earl Roddy, W. E. Driver, F. M. Perry, J. B. Lee and M. L. Jones.

Honorary pallbearers were B. O. Hawkins, Evin Ghoshon, Bryan Metcalf, R. O. Gibson, E. F. Jones and A. G. Jones.

Galloway was born at Murray, Kentucky, February 22, 1895. He had farmed at Aspermont prior to retirement, and was county commissioner from 1943 to 1948. He was a member of Johnson Chapel Baptist Church, west of Aspermont.

Survivors include his wife, Mrs. Zona Galloway; four sons, Howard Galloway of Lubbock, Dero, Victor and Zearl Galloway, all of Aspermont; one daughter, Mrs. Thelma Kutting of Aspermont; six sisters, Mrs. Gertie Lay of Bakersfield, California, Mrs. L. M. Reese of Aspermont, Mrs. George Gillespie of Peacock, Mrs. Joe Lawrence of Odessa, Mrs. Dutch Horton of Spur and Mrs. C. E. Brannen of Abilene; three brothers, Oscar Galloway of Aspermont, Virgil Galloway of Ranger and Athel Galloway of Peacock; six grandchildren and two great-grandchildren.

FAMILY EARLY RISER.

Sandra, four, had never seen her father set the alarm clock. "Daddy," she asked one day, after having thought it over for some time, "who is it that comes and rings our front doorbell every morning when it's time to get up?"

STORY OF IDEAS.

Only the wise possess ideas; the greater part of mankind are possessed by them.—Samuel T. Coleridge.

ferred from lifting a heavy object improperly or from slipping, is painful—and often costly," the council said.

Johnson Grass, Now prolific, May Be Used at Profit

ollowing the recent abundant rains in the territory, Johnson grass has abounded in many areas. Johnson grass is a forage crop or a weed, depending on where it occurs. It can be undesirable anywhere under certain field conditions, but farmers in adapted areas may well sing its praises if they are willing to tolerate certain peculiarities.

Johnson grass can be a good quality hay or grazing crop, according to recent data from the Denton agricultural experiment station. When used as hay it should be harvested in the boot stage, says Extension Agronomist E. M. Trew. Properly harvested, Johnson grass is as nutritious as sudan and has comparable quality.

One or two hay crops per season can normally be harvested from Johnson, he says, with yields ranging from one to three tons per acre.

Although condemned by some, Trew says Johnson grass is definitely valuable as a pasture if properly managed. It can be profitably grown with such winter legumes as sweet clover or burr clover. There is some danger, as in all sorghums and sorghum grasses, of prussic acid poisoning if the crop is grazed while resuming normal growth after drought or frost retardation. Usually the plant contains only small quantities of the acid, however, and few livestock are poisoned by it.

Improved Johnson grass, sorghum-Johnson grass and perennial sweet sudan grass in 40-inch rows at Denton averaged 5.640 pounds of hay per acre—over 900 pounds above similar crops in 12-inch rows. Over-crowding the plants reduces production materially, Trew warns.

Johnson grass does have a profitable place in certain agricultural situations. Given a proper chance this "weed" can pay handsome dividends.

RIGHT SPOT FOR HIM.

The freshman's father paid his son a surprise visit. Arriving at 1:00 a. m. he banged on the door of the fraternity house.

A voice from the second floor yelled, "What'dya want?"

The father answered, "Does Joe Jones live here?"

"Yeah," answered the voice, "bring him in."

ROBY, TEXAS

Paul Bryan Lumber Co. HAMLIN, TEXAS

Are you a Loyal Home-Towner? Do you spend your money with your friendly local merchant?

WHY re-enlist in the small- car army?

READ THIS STARTLING FACT

**5 out of 10 Smaller Cars
wear a Pontiac Price Tag
—yet none gives you Any
of Pontiac's Advantages**

PONTIAC GIVES YOU UP TO 8% MORE SOLID CAR PER DOLLAR!

Not one of the smaller cars can give you the heavy-duty construction, the road-hugging hoff and solid security that surround you in every Pontiac. Yet Pontiac's nimblest heavyweight you ever managed—and your Pontiac dealer can show you more than six dozen advanced-engineering reasons why! Pontiac has gone all out to make this genuine big car the best behaved beauty that you ever had the pleasure of bossing. You'll find Pontiac's exclusive Precision-Touch Controls make steering and braking the surest, easiest you've ever experienced! Park it, cruise it, try it in stop-and-go traffic . . . this is driving the smaller jobs can't duplicate!

PONTIAC GIVES YOU 4 TO 7 INCHES MORE WHEELBASE!

The small cars extend bumpers and fenders to look big—but Pontiac puts the extra length where it counts—between the wheels! Pontiac's longer stride brackets the bumps instead of riding on them. And this extra length shows up inside, too, in stretch-out space for six footers. Add to Pontiac's bonus in length its all-new suspension system and you have an exclusive Level-Line Ride no car at any price can surpass . . . and a built-in sense of direction and security that will spoil you for the smaller jobs forever!

PONTIAC'S PERFORMANCE TOPS THE BEST THE SMALL CARS CAN OFFER—BY A WIDE MARGIN!

Not one of the smaller cars can measure up to Pontiac Performance. Whether you judge a power plant by engineering statistics or on-the-road performance, Pontiac's Strato-Streak V-8 stands head and shoulders above anything in the low-price field. Your Pontiac dealer will be happy to show you a complete facts-and-figures comparison—then an eye-opening test drive is traffic or out on the highway will supply all the heart-lifting proof you need that Pontiac has separated the men from the boys when it comes to performance!

—AND PONTIAC HAS ALWAYS BEEN FAMOUS AS ONE OF AMERICA'S TOP TRADE-INS!

Maybe it comes as a surprise to you that so much more car can be yours at the same price you've seen on the smaller cars. But there's the fact! And Pontiac is a wonderful investment, too! As you know, it has always commanded a top trade-in. So why not step out of the small-car class and into a Pontiac . . . there's nothing in your way. Your Pontiac dealer has the keys and an eye-opening offer waiting for you right now!

So why not look and feel like a million—instead of a million others?

NOW! If you want the ultimate in both economy and extraordinary performance, now Tri-Power Carburetion is available at extra cost on even the lowest priced Pontiac model. It's America's newest power advance and exclusively Pontiac's at so low a cost

Controlled Radiation Is Great Boon To Treatment of Diseases, Says SHD

Considerable anxiety has been felt in the Hamlin territory as well as over all the country in recent weeks over conflicting reports about the effects of radioactive elements.

Last month an Austin State Hospital physician called the State Health Department to report that a radium needle, being used to treat a patient with skin cancer, had been dislodged or lost.

Did the department have radiation detection equipment with which the needle might be located? The department did, and the needle was subsequently found in a gauze bandage.

This incident, one of many that take place every month, illustrates the manner in which the department's division of occupational health, working in cooperation with private physicians and other agencies, is quietly going about the task of protecting citizens from the dangers of excessive radiation exposures.

A great deal has been said in recent months about the imminent peril the entire nation is facing from excessive radiation. Much of that information has been true in general, but some of it has been misconstrued to the point where people have canceled much-needed x-ray treatments or exami-

nations because of unjustified fear of radiation damage.

One of the state's leading radio doctors, Dr. W. L. Gandy, in the Texas Medical Association Journal, has summed up the situation by saying that curtailment of radiologic examinations would cause a failure in diagnosis that would result in many times the number of deaths that would theoretically occur from radiation accumulation in the population 20 generations from now.

There is no question but what the various sources of radiant energy, now in use—isotope usage in industry and medical research and the so-called "fall-out" from nuclear weapons testing—are potentially dangerous.

But the very fact that danger exists serves as a sort of safety valve. Persons engaged in peacetime use of radiation equipment and materials, acutely aware of the hazards, act with extreme caution.

Competent physicians and dentists keep accurate records of their patients' radiation exposure level. Wealthy foundations have been set up to train technicians in the safe use of radiation devices. And federal and state governments—along with medical, dental and engineering schools—

RECEIVES HONORARY DEGREE — Mr. and Mrs. H. J. Lutcher Stark of Orange look at an honorary degree given to Mrs. Stark by Texas State College for Women. Mrs. Stark is the first person ever to receive an honorary degree from the college. Mrs. Stark, a graduate of the school and a member of the Board of Regents, was awarded a Doctor of Laws degree for "singularly and exceptionally high civic and humanitarian achievements."

have made considerable investments of money to insure the proper control of radiant energy equipment.

And as a sort of clincher, the State Department of Health of Texas is one of five states which has complete regulations regarding the registration and proper use of all radiation producing equipment and materials.

So, while it is true that ever increasing uses of radiant energy in national defense, medicine and industry does demand that we exercise every precaution, that caution must be tempered with common sense. Radiation in controlled amounts can be more beneficial than hazardous.

Industry need not wish.—Benjamin Franklin.

County 4-H Club Youths Win Trip To State Session

Six Jones County 4-H Club boys and girls won the junior leadership contest of District III, according to Bill Lehmburg, county agent, and Mary Y. Newberry, home demonstration agent. The boys and girls who will be awarded an expense paid trip to Bastrop to the Texas 4-H Junior Leadership Laboratory are: John Bill Oman of Erickson, Jimmy Roberts and Johnny Mitchell of Anson; Patsy Wade of Anson, Nancy Hunter and Karen Irvin of Nodale.

The laboratory will be held at Bastrop State Park on August 25 through 31.

Purpose of this 4-H Club junior leadership training program is to encourage older 4-H Club members to develop those leadership qualities that are essential to progress and wholesome community life; to hold the interest of older club members; to produce leaders from the ranks of club members; to provide leadership assistance to adult leaders and agents; and to develop opportunities for service and helpfulness to others.

The agents will accompany the group to Bastrop.

Reykjavik is the only large town in Iceland.

New Methodist Pastor Speaks at Lions Luncheon

"The Church: Its Place in Our Lives" was the topic of a talk by Rev. Edmund W. Robb, new pastor of the First Methodist Church, when he spoke at the Tuesday noon luncheon meeting of the Hamlin Lions Club at the oil mill guest house.

The newcomer to town spun an array of yarns, then got down to the serious side of his subject. He was presented by Ted Russell.

"The church has been responsible for many of the present day reforms," Robb declared. He then went on to point out that the church had been the chief factor through the centuries that fought for freedom, and it continues to be the guardian of that freedom. It has sponsored free education, he said, pointing to the earliest universities of this country that were founded by the church. The church has raised the economic standards of people, and is responsible for community progress through the years.

Mrs. McCarley, who was 88 years of age, died last Tuesday morning at the home of a daughter.

Climaxing his remarks with a plea for support by its members, he urged his hearers to give their allegiance, loyalty, attendance and support to the church of their choice.

It was announced that installation of new officers for the club year beginning July 1 will be conducted at next Tuesday's Lions Club meeting, with Deputy District Governor B. V. Newberry officiating.

Mrs. J. C. McCarley

Buried at Hamlin

Last Wednesday

Funeral services for Mrs. J. C. (Uriella) McCarley, sister of Mrs. Mrs. S. D. McMahon, were conducted last Wednesday afternoon at the First Baptist Church in Hamlin. Officiating were Rev. Calvin Bailey, pastor, and Rev. Tom Brandon, pastor of the Wichita Street Baptist Church in Fort Worth, home church of Mrs. McCarley.

The newcomer to town spun an array of yarns, then got down to the serious side of his subject. He was presented by Ted Russell.

"The church has been responsible for many of the present day reforms," Robb declared. He then went on to point out that the church had been the chief factor through the centuries that fought for freedom, and it continues to be the guardian of that freedom. It has sponsored free education, he said, pointing to the earliest universities of this country that were founded by the church. The church has raised the economic standards of people, and is responsible for community progress through the years.

Mrs. McCarley, who was 88 years of age, died last Tuesday morning at the home of a daughter.

Climaxing his remarks with a plea for support by its members, he urged his hearers to give their allegiance, loyalty, attendance and support to the church of their choice.

"I told you not to argue politics with him!"

IT'S THE LAW IN TEXAS

A Public Service Feature of the State Bar of Texas

(This column, based on Texas law, is written to inform—not to advise—persons should ever consult an attorney and law with the aid of an attorney who knows the facts, because the facts may change the application of the law).

YOUR CHILD AND THE DOCTOR

It's a good idea to give written consent for necessary medical care if your child leaves home for a visit or a camping trip, or if you plan to be away for any length of time.

For example, a summer camp nurse may bring a boy into a hospital with an acute case of appendicitis. But the doctor may well hesitate to go ahead and operate without the parents' consent.

Is the doctor arbitrary, and is such permission just a legal technicality? No, he is well within his rights, though he may give first aid—but only for emergency treatment where a child's health or life may be at stake. He is likely to put off follow-up care until he can reach the child's parents. A relative or baby sitter generally cannot grant consent for a child's treatment.

Even an adult must request treatment and grant consent to medical care on his own behalf before a doctor can give it to him. Children cannot do this.

By going to your doctor you show your willingness and consent to accept his treatment. Your consent is assumed also when you ask for a house call by the doctor, or if as a result of an accident you come to a hospital for emergency treatment. If you are unconscious, the doctor may well give you emergency care, yet later he should get your consent to further treatment.

Minors cannot consent to medical treatment, and except in dire emergencies their parents or guardians must give it for them.

The consent should not be broadly or loosely phrased, but should be as specific as circumstances permit.

The principal reason for having the consent in writing is to avoid later misunderstandings. It is a protection both to the patient and physician.

FATHER OF YEAR—Ira Irving Isbell, 73-year-old retired school teacher who has taught 5,000 students and lives in Fort Worth, has been selected as Texas Baptist Father of the Year. The veteran school master, who spent 37 years in classrooms and has taught Sunday School classes for 45 years, is now crossing patrolman and tutors high school students.

SAME EXAMPLE.

Man (in department store)—"Wait! You sell cigars but you don't let smoking?"

Sales Girl—"Yes, sir. We also sell bath towels."

Footings Run on First Baptist Church Plant

Concrete footings for the foundation of the new \$60,000 educational building of the First Baptist Church have been run by the contractor on the job, which has been slowed by wet weather.

Real showings on the new structure are scheduled to be made soon, declares a representative of the contracting firm of Colorado City.

The Washington Monument in Washington, D. C., is 555 feet high.

ROUTHS HAVE GUESTS.
Mrs. W. E. Brown and daughters, Sarah Lou and Betsy, of Midland visited her parents, Mr. and Mrs. Tom Routh. Other visitors in the Routh home recently were Mr. and Mrs. M. L. Rothell of San Francisco, California. Mr. Rothell is a brother of Mrs. Routh.

ANOTHER GAMBLER.
There's the touching story of a braggart young man who said to his girl: "I bet you wouldn't marry me!"

As it turned out, she not only called his bet, but raised him five.

HAMLIN MOTOR COMPANY

Popvalve

Being a column in which the publisher just "blows off the steam."

By Willard Jones

JOHN HOWARD, affable grocery man down the street, was out last week for several days because of the effects of having a jaw tooth pulled.

Earl Crow, deliveryman at the store, was jibing John about his not being able to take a little pain.

"Why, John," he said, "if you had had nine teeth pulled all at once like I did, they would have to take you to the cemetery."

"Why," John countered, "there are lots of fellows out in the cemetery now who didn't feel half as bad as I did."

MODERN DOCTORING has brought about quite a broad change in methods. From old fashioned home remedies that were used years ago we went to patent medicines, then to prescriptions, and now there is a "shot" for practically anything that is the matter with a human.

One patient, reportedly tired of the familiar spot that many of today's shots are being administered, came up with this enigma:

They "shot" me where the shooting's best.

I'm through with flu; I'm rid of it. The wonder drugs have passed the test.

I wonder now: How do I sit?

THEY ARE TELLING this on an Anson grocer who made his own bed recently:

The butcher had sold all of his poultry except one hen. In walked a woman who said she was entertaining at dinner and wanted a nice sized hen. The butcher reached into the ice barrel and brought forth his hen, flipped it on the scales and said, "This one will be \$1.85."

"Well," she said, "I really want a larger one."

The butcher, thinking fast, returned the hen to the ice barrel and stirred it around for a while, then brought it forth again and flopped it on the scales.

"This one," he said, "is \$1.95."

The woman considered briefly and then said, "I know what I'll take both of them."

AHMLIN LAD, in one of his final efforts of the recent school term, turned in the following essay on geese:

"Geese is a low, heavy-set bird which is mostly meat and feathers. His head sits on one side and he sits on the other. Geese can't sing much on account of dampness of the moisture."

"Some geese when they get big has curls on their tails and is called ganders. Ganders don't have to sit and hatch but just eat and go swimming."

"If I were a goose, I'd rather be a gander!"

SMILES AND FROWNS reflect most of the time what is going on in one's head and heart. An unknown author pens these interesting lines:

If I knew the box where the smiles are kept,

No matter how large the key, Or strong the bolt, I would try so hard

"Would open, I know, for me. Then over the land and the sea broadcast

I'd scatter the smile to play, That children's faces might hold them fast,

For many and many a day.

If I knew a box that was large enough

To hold all the frowns I meet,

I would like to gather them every one

From nursery, school and street, Then, folding and holding, I'd pack them in,

And, turning the monster key, I'd hire a giant to drop the box To the depths of the deep, deep sea!

LITTLE BENNY, it is reported in a local church bulletin, went to the grocery store with his mother. To her surprise he shyly refused the grocer's suggestion that he help himself to a handful of Indian nuts from a box on the counter.

"Oh, come now, I never heard of a boy who didn't like Indian nuts," said the grocer as he took a bag, scooped up a handful of nuts and handed them to Benny.

On the way home Benny's mother asked, "Tell me, son, why didn't you accept them in the first place?"

"Because his hand is bigger than mine," explained Benny.

ALMOST GONE—Flood waters rushing over the spillway of Lake Texoma into Shawnee Creek near Denison washed out most of this railroad trestle. The trestle is on a spur track leading from the Denison Dam powerhouse to Yellow Jacket Boat Company, Inc. Engineers expected the bridge to give way. Waters above the big lake washed out the bridge of the Santa Fe Railway line running from San Angelo to Altus, Oklahoma, through Hamlin, and traffic over the bridge was rerouted for about 10 days.

Wheat Growers Will Ballot June 20 on Market Quotas

Rate of Parity Payments to Be Gauged by Vote

NEW PASTOR of the First Methodist Church in Hamlin is Edmund W. Robb, who moved with his family last week into the parsonage on Southwest Avenue A. He succeeds Rev. Darrin L. Egger, who was assigned to the First Methodist Church at Dimmitt.

Interest Shown in Summer Recreation Program at HHS

Considerable interest is being manifested in the summer recreation program for youth of the Hamlin community being started today (Thursday) at the new HHS gymnasium, declares D. C. Andrews, new head coach of the Hamlin High School, who will stage Friday evening at 5:30 o'clock.

Both boys and girls of next year's sixth grade through high school will be eligible to participate. The program will begin at 9:00 a.m.

The sixth, seventh and eighth graders will participate from 9:00 to 10:30 a.m. The high school level students will attend from 10:30 to 12:00 noon.

Recreation will consist of volleyball, basketball, tennis, ping-pong and shuffle board. All participants will be expected to wear tennis shoes while on the gym floor, Andrews states.

The summer recreation program is designed to give supervised recreation and special athletic training for those who want need it during the summer period, the coach announces.

Regular workers in the business section are being urged to park their cars in alleys or elsewhere off the "main drag" in order to give customers of the store the parking space, Police Chief E. B. (Buddy) Watson says.

Church of Christ at Tuxedo Sets Meeting

An eight-day gospel meeting will begin Sunday, June 16, at the Tuxedo Church of Christ, leaders of the congregation announce. The services will continue through Sunday, June 23.

M. J. Cunningham of Dallas will be the minister. Spiritual singing will also feature the services.

Services will be held each evening at 8:15 o'clock and each Sunday morning at 10:45. Everyone is invited to attend.

Two Hamlin girls, both recent graduates of Hamlin High School, enrolled last week at an airlines training center at Omaha, Nebraska, for a 10-week course in airlines stewardess work.

The girls are Lavada Teichelman, daughter of Mr. and Mrs. Fred C. Teichelman, and Charlotte Jo Wallace, daughter of Mr. and Mrs. W. Wallace.

Services will be held each evening at 8:15 o'clock and each Sunday morning at 10:45. Everyone is invited to attend.

 Paul Bevan...Utility

Entered at the Post Office at Hamlin, Texas, for transmission through the mails as Second Class Matter, according to an Act of Congress, March 3, 1879.

Any erroneous reflection upon the character of any person or firm appearing in these columns will be corrected, gladly and promptly, upon its being brought to the attention of the management.

MAKING ACREAGE COUNT WITH PRODUCTION

Farming in the Hamlin territory, like every other business and enterprise, is more complicated and expansive—with more items of expense of maintenance and operation—than it was several years ago. The farmer has to maneuver every conceivable method of economy, short-cuts and production improvements in order to show a profit on his operations.

And the farmer who does not put into practice modern techniques, use up-to-date equipment and streamline his whole farm plan has a hard time coming out on the long end of things at the end of the crop year. His predicament, we say again, is no different from the average business man, who likewise has to seek cost-cutting facilities while offering more service on smaller margins of profit.

But how can a farmer change his methods when he has the same land to farm he had 15 years ago? How can he show a profit when it looks like everything he has to sell is down in price while everything he has to buy has skyrocketed to new highs? Those are tough questions that will not be answered by simple answers. Nor will the answers be easy to carry out.

The over-all answer to the farmer's problem is that he just must produce more on what acreage he has at less cost.

Ways to produce more are a conglomera-

tion of improved methods. Enriching the soil by water conservation, fertilizers and plowed under legumes are vital nowadays. Planting of better seeds to insure better stands and higher quality products is a good practice; improved cultivation techniques, plus control of weeds and grasses at critical stages in the growth of crops will pay off; use of insecticides and other poisons that will assure higher yields are practical modern practices that up production; harvesting rightly timed with proper equipment will help further to get all the production in its prime condition.

Farming, to be successful, cannot be done on a slip-shod, hap-hazard program any more if it is to show a profit. Grandad's methods may have been all right in his day, but certainly he did not have the competition, the expenses nor the high priced land that today's farmer must face before he really gets started.

To be sure, there is still money to be made in farming. But it requires initiative, planning and spizzerinkum to wrest the living from the soil—just as it requires these same principles to make a living in any field today.

Farming has a bright future for those who will determine to modernize their thinking as well as their equipment. Drouth has put many a farmer "behind the eight ball," but will and mind will overcome the recent set-backs!

Plenty of Part-Time Jobs

Women's chances of getting a part-time job nowadays are good. Roughly 15,000,000 women, most of them housewives in their thirties or forties, do have such jobs, a recent survey shows.

What kind of a job would you like? There is a part-time position in just about any field you can think of. Here are some of them:

During holiday seasons, you will find openings in retail stores for saleswomen, clerks, fitters, seamstresses, stock girls and food service employees.

If your interest leans more toward schools, nurseries, libraries or museums, you will find there is a need for house mothers, library aides, assistant curators, teachers, music accompanists and program directors.

A large field for women is in medicine. Here, lab technicians, therapists, social workers, practical nurses, nurses' aides, dining room and kitchen employees are needed. Most of the jobs are in hospitals and clinics, few in private offices. Professional training is required for many jobs, but there are very few age limits.

Charitable, social and religious organizations need plenty of part-time workers. Experience requirements vary with the job, but if you are qualified, you will find openings for program and publicity directors, librarians, group leaders, social workers, and speech, physical and occupational therapists.

Incentive Is the Answer

At more or less regular intervals, questions are raised as to the propriety of the depletion allowance which has long been given to oil producers. This allowance, amounting to 2½ per cent, is a credit against income taxes.

That credit, however, is not given just to make the producers happy, or to do them a favor. It is given—and has been approved by Congress after Congress for many years—because of certain incontrovertible facts.

One fact is that oil wells wear out. They become exhausted and must be replaced. In other words, even the best of them are steadily declining assets.

Another fact is that finding new wells to replace the old—and to keep our oil reserves at necessary levels in a time of enormous consumption—is about as risk a matter as one can imagine. Of every nine wildcat wells drilled, eight turn out to be dry and, therefore, worthless. And the average cost of each wildcat well is a handsome \$123,000.

THE HAMLIN HERALD, HAMLIN, JONES COUNTY, TEXAS

RECALLING Other Years

Being news items taken from old files of Your Home - Town Newspaper, The Herald.

TWENTY YEARS AGO.

Among news items of interest in the Hamlin community 20 years ago were the following, reprinted from the issue of The Hamlin Herald dated June 11, 1937:

Janie Mae Johnson returned home Wednesday from Sioux City, South Dakota, where she has been teaching in the public schools.

Born to Mr. and Mrs. Clarence Bailey last Tuesday a fine new son,

Among prices advertised by the Bryant-Link Company are: Men's dress shirts, \$1; one rack of ladies' dresses, 79 cents; men's white dress shoes, \$2.95; men's suits, \$13.95.

Mary Boyd, who has been teaching in the Fort Stockton public schools, is at home to spend the summer with her parents, Mr. and Mrs. W. L. Boyd.

Warren Nobles has completed his sophomore year at Texas Tech, and is here to spend the summer with his mother, Mrs. Vera Nobles.

Mr. and Mrs. M. E. Witt of Lubbock were here this week to visit their son, I. R. Witt, and family.

Mr. Witt is head of the chemistry department of Lubbock High School, and will be remembered as a teacher of the first school in Hamlin years ago.

TEN YEARS AGO.

Reviewing the past, The Herald reproduces the following items of interest in the community 10 years ago, taken from the issue of The Hamlin Herald dated June 13, 1947:

Mr. and Mrs. R. H. Gardner have announced the approaching marriage of their daughter, Frances, to M. R. Young of Ralls. The wedding date has been set for June 21.

Marguerite Nobles, daughter of Mrs. Eskin Nobles, became the bride of Edward Milton Raley at the First Baptist Church Saturday morning.

Jimmy Spencer, son of Mr. and Mrs. A. Spencer, was honored at a birthday party Sunday.

Koleta Clements, bride-elect of Glenis Galen Costin of Abilene, was honored at a gift tea Wednesday afternoon in the home of Mrs. Joe L. Culbertson.

Mr. and Mrs. H. E. Weir and son, Gene, and daughter, Jerry Lynn, of Troy spent the week-end with his brother, Dr. W. D. Weir, and family.

Joe Hargrove has gone to Denton to enter college.

Bettye Sellers has entered a business school in Fort Worth.

Mr. and Mrs. Charles Connally of Sweetwater are announcing the birth of a son on May 19 in a Sweetwater hospital. The young man has been named Charles Edward Jr.

FIVE YEARS AGO.

Goings-on in the Hamlin community five years ago included the following, reproduced from the issue of The Hamlin Herald dated June 13, 1952:

I. R. Hutchingson, Hamlin school superintendent, was elected new district governor of Lions Clubs at the district convention Monday at Brownwood, barely nosing out a Fort Worth man.

Neighbors of E. E. Johnson, farmer in the Carlton community southeast of Hamlin, worked his farm this week as a gesture of friendship for the man, who recently suffered a severe heart attack.

Rev. Victor Ortiz, 57-year-old pastor of the Mexican Baptist Mission Church in Hamlin, this week received his degree from Hardin-Simmons University at Abilene as the climax of six years of schooling at H-SU. Declining late in life to become a minister, he determined not to let family obligations and other difficulties keep him from getting a good education. He will go to the Golden Gate Baptist Seminary at Berkeley, California, for further training.

ONE YEAR AGO.

As we recall other years in the Hamlin territory, we reprint the following items of interest taken from the issue of The Herald dated June 14, 1956:

Hamlin's new swimming pool at the City Park is proving popular these days. Swimming classes are being conducted by Hollis Adams and Dutch Encke of Anson.

The Skyrockets, colored girls' baseball team, have won the first six games they have played so far.

Eighteen Hamlin Boy Scouts and Scoutmaster Weldon Johnson are this week attending the annual district Boy Scout camp at Camp Tonkawa near Buffalo Gap.

A new curb and gutter project is being worked out by members of the City Council. A tentative price of 85 cents per foot has been set for the work that will be done by a crew from the city maintenance department.

Babson Says Training in Selling Will Help to Relieve Over-Production

Skyrocketing labor costs have forced employers to resort to unprecedented technological research, it is pointed out by Roger W. Babson, famous analyst and economist, who is a regular columnist for The Herald. This article for the week continues: This research is teaching employers

(3) Only the serious and intelligent employees will get raises. There will be no limit on salaries for those with the necessary character, brains, initiative and loyalty.

(4) Our great problem will not be to raise crops, build homes or manufacture goods—but to get people to buy. Hence, instead of subsidizing farmers, we may eventually subsidize merchants and salesmen.

(5) I advise young men to become expert machinists instead of lawyers, trained outside salesmen instead of inside pencil pushers, and after graduation to attend night school to prepare for the new age.

SEEKING HIS KILL.

The tired engineer had had it. Everything during his run had gone wrong. To top it off, a cow strolled onto the tracks and his train had killed it.

Dutifully the engineer climbed down from his cab and searched out the cow's owner.

You mean to tell me my cow was on the tracks?" the farmer exclaimed.

"No," the tired, disgusted engineer replied, "I chased it across three fields."

VISION CLOGGED.

The family had been away with father for a year while he did further study at another university. Home and acreage looked very wonderful to the youngest after living in an apartment, newly built and treed.

Looking out of the dining room window with a look of deep satisfaction, she whispered, "My, our window's stuffed with trees!"

County Agent Says Treated Seed Help To Prevent Diseases

Cotton and maize planting will be in full swing by this weekend if the rain holds off, declared Bill Lehmburg, county agent, this week.

Recommended varieties of cotton are Superproof No. 1, Lockett 140, Paymaster 54, Western Stormproof and Northern Star. Many acres will be planted to the old stand-by Lankart.

Maize varieties that hold the most promise are hybrids RS 160 and Texas 620 and non-hybrid Redbine 58.

All seed should be treated to prevent seedling diseases, declares Lehmburg.

Further information can be obtained at your county agent's office at Anson.

KNEW HIS PURPOSE.

A man walked into a grocery store in a small town.

"Yes, sir," the obliging clerk said, "may I help you?"

"Ha, ha!" the clerk laughed.

"You must be going to see the comedian at the theater."

"Not so loud," demanded the man. "I am the comedian."

The first set of boxing rules and the first set of boxing gloves were made by Jack Broughton in 1743.

DESENSITIZE THAT ITCH! JUST 15 MINUTES

If not pleased, your 40c back at any drug counter. Instant drying ITCH-ME-NOT! deadens itch in minutes; kills germs on contact. Use day or night for eczema, insect bites, foot itch, other surface rashes. Now at Howard City Drug.

SAVE BIG MONEY! ACT NOW!

PICK and SAVE today!

Special orders for colors and equipment increase our selling expense. Buy from stock and we'll give you what we save!

PICK FROM STOCK!

- There is a wide selection of colors and models to choose from, now!
- No waiting. Pick yours out—drive it out, tonight!
- First come, first choice. Get The Big M you want while they last.

SAVE PLENTY NOW!

- Record-breaking sales permit largest allowances this year!
- Your present car has never been worth more!
- Easy terms arranged, fast. Come and get your Big M!

Effectiveness of Recent Rains in Area Has Been Governed by Shape of Soil

How effective have the April and May rains been? Penetration tests made after the recent rains provide the answer, declare officials of the California Creek Soil Conservation District. These tests once again proved that soil condition and cover must be good.

The county received an average of 12.25 inches of rain from April through May 21. Root-plowed pasture on a mixed land range site was wet down seven feet, whereas non-root-plowed bare pasture was wet down only two feet. The root-plowed pasture stored the entire 12.25 inches of rainfall. The non-root-plowed pasture stored 3.5 inches of moisture with a total run-off of 8.75 inches. Terraced mixed land was wet down three to four feet. On non-terraced mixed land the soil was wet 2.5 to three feet deep.

The bare red soil on a hard land range site was wet down one foot. This represented two inches of moisture stored with a total run-off of 10.25 inches. On red soil under a good cover moisture penetrated to a depth of 3.5 feet. This was representative of seven inches of moisture and 5.25 inches lost due to run-off. Terraced red soil checked outside terrace channels was wet down 18 to 24 inches. Four inches of moisture was stored. 8.25 ran off. Non-terraced red soil was wet 12 to 15 inches deep. Only two inches of moisture was

stored in the soil as compared to 10.25 inches lost to run-off.

Terraced black land was wet down 3 to 3.4 feet. This represented six to seven inches of moisture stored with a total run-off of five to six inches. Non-terraced black land was wet down 1.5 to 2.5 feet. It stored three to five inches of rain with a run-off of seven to nine inches.

Three main factors govern moisture penetration into the soil. They are: Soil type, slope of the land, and soil condition and cover. The soil condition and cover go hand-in-hand. Soil type and slope cannot be changed very much. The principle of cover on the land applies to both cropland and pasture.

Now is the time to think about leaving a cover on your pasture from the growth that is on it. Leave that grain stubble on top of the land. It will increase the value of advertising and selling is still moisture intake of the soil and reduce rate of run-off.

"Remember, it is only the water you keep that does any good. So, for the land's sake keep it covered!"

Plans Shaping for Fisher County Rodeo And Fair in August

Plans were put underway several days ago for the twelfth annual Fisher County Rodeo and Fair, scheduled at Roby this year on Thursday, Friday and Saturday, August 22, 23 and 24, officials of the event announced.

Ed Carter has been named general director of the annual show. The fair will feature animal, crop and culinary exhibits at the fair ground, located in Southwest Roby.

Glen Webb, Roby rancher, has been renamed rodeo director. He says Goat Mayo of Petrolia will furnish the stock again this year. More details about the fair and rodeo will be carried in The Herald in subsequent issues.

RUNNING INTO MONEY.

Customer—"The big dog is \$20, the little dog is \$75, and the tiny one is \$200. Is that right?"

Clerk—"That's right, sir."

Customer—"How much will it cost me not to buy any dog at all?"

WINS FIDDLE CONTEST—Covered with a raincoat to protect him from a drenching thunderstorm, Garland Spurgeon Rose, 68, of an Antonio fiddles his way to the championship of the over-65 group at the annual Old Fiddlers Reunion at Athens.

Defective Tires and Brakes Account For Many Deaths and Injuries on Road

Defective tires and brakes can be killers, the National Safety Council warned motorists today.

Tires that are cut and worn thin invite a motor vehicle accident, the council said. In time of stress—especially when going around curves—they may fail.

Blow-outs or unsafe tires are factors in one of every 100 fatal accidents and in one of every 100 non-fatal accidents.

To lessen the chance of blow-outs, the council advised motorists to:

1. Rotate tires regularly.

2. Have tires checked by competent garagemen.

3. Watch for tell-tail signs—frequent loss of air, for example, of the failure.

4. Replace worn tires periodically.

Brake failures are reported in two of every 100 accidents and in two of every 100 fatal accidents.

So-called long brakes—brakes that must be pushed near the

floor-board before they work—will cause trouble when quick stops are necessary. Brakes that require frequent pumping are dangerous, too, the council said.

Brakes that can stop a car traveling 20 miles an hour in a distance of 17 or 18 feet are rated excellent.

Average brakes can stop a car at 20 miles an hour within 21 feet. At the same speed, most cars can stop within 25 feet.

Powerful brakes, the council said, are safety factors, of course, but they can be dangerous, too, if they are used to stop a vehicle with complete suddenness.

Passengers may slide off seats and be injured. Children, in particular, may be hurt because their legs are too short for them to brace against foot rests.

Sudden stops of trucks may result in a load shift and cause overturning.

Rubber bands at The Herald.

Miracle Whip SALAD DRESSING

Wheat Growers Will Vote June 20 on New Crop Marketing Quotas for 1958

must approve quotas before they can be put in effect. He also stated that individual farm quotas generally will be the actual production from the farm's wheat acreage allotment.

Should quotas be approved, Roll explains, Jones County wheat growers who comply with their allotments will be eligible for price support on their entire production. Wheat growers who exceed their farm acreage allotments will be subject to marketing quota penalties on their excess wheat if they have more than 15 acres of wheat for harvest as grain in 1958 come under the regulation of quotas and will be eligible to vote in the referendum.

States having wheat allotments of 25,000 acres or less have been designated "non-commercial" wheat states, and allotments and market quotas do not apply therein.

Growers in commercial wheat states who will have more than 15 acres of wheat for harvest as grain in 1958 come under the regulation of quotas and will be eligible to vote in the referendum.

Nothing is particularly hard if you divide it into small jobs.—Henry Ford.

Senator Johnson Says Foreign Aid Bill Being Given Careful Consideration

The administration's foreign aid bill will come to the floor of the Senate soon, points out U. S. Senator Lyndon B. Johnson, in his weekly news letter, which continues: The entire record of the foreign aid program should be studied carefully in order to find the best course for our country.

Two types of assistance have been included in our economic aid programs since the end of World War II: Direct grants in which we simply give another country money or goods; loans for which we expect repayment.

Personally, I believe that nations are like people. At times a direct grant may be necessary to someone who is suffering and in distress. But, generally speaking, people who are in trouble prefer a loan that helps them get back on their feet.

CUSTOMARY FUNCTION.

An airliner, flying leisurely along, had almost reached its destination when serious trouble suddenly developed. Two engines burst into flame; a heavy fog eliminated all visibility; and to make matters worse the co-pilot had blacked out. Those aboard were numb with terror—all that is, except one, a minister, who took it upon himself to comfort the others.

"Let us all kneel and pray," he said warmly. "It will calm our hearts and minds."

After all had kneeled, however, one old gent still remained standing.

"Why aren't you praying like the rest of us?" asked the minister.

"Because," came the answer, "I don't know how."

"In that case," advised the minister, "just do something religious."

All eyes following him, the old gent snatched his hat, bowed reverently and, proceeding down the aisle, began taking up a collection.

Jacobean furniture was named in honor of King James I of England.

TRAVEL TIPS

June's here. Summer is in the air. Now's the time for fishing trips, honeymoons, week-end jaunts and full-fledged vacations.

Summer also is the time when Long Distance service can come in extra handy.

Just a call or two to relatives or friends, to the hotel or fishing lodge, and all the details of your vacation are quickly worked out.

Traveling by car, you make the most of each day's driving conditions by calling ahead for reservations. And you can change your time table as you go along.

Long Distance helps in arranging those spur-of-the-moment week-end jaunts, too. A couple of calls, a few hours' notice, and you're on your way.

And when you do take off, cross-country or just for the week-end, let the "worriers" at home know you're okay—by Long Distance. Wherever you go, you're never far from a phone.

WATCH OUT FOR KIDS

In the telephone business we pay a lot of attention to safety and safety training.

Every year at this time there's a special reminder for telephone drivers: "School's out. Watch out for kids."

I repeat the reminder here because it's so important, and because it seems to apply equally to everyone who drives.

Telephone drivers are anxious to join with all of you in doing everything possible to make this an extra safe summer.

Maybe the best way to do that is to use a heavy foot on the brake and a light one on the gas pedal, especially near playgrounds and in residential areas. You have our pledge to drive safely—this summer, and all year long.

LET DAD RELAX

For one reason or another, I always end up with the "telephone answering job" when I'm home evenings.

Happens all the time. Wife's tired. Kids are busy, or in bed. It's up to me to answer all calls.

If the man of your house is in the same fix, why not make it easy for him? See to it there's a telephone near his favorite evening relaxing spot. Then he can just reach—instead of run—when the phone rings.

Father's Day is coming up, June 16.

We'd be glad to work with you on arranging a gift telephone for him. Just call us at the telephone business office. The number is 187. We'll take it from there.

The price for an additional telephone is only \$1.00 a month, plus installation.

Call by number. It's twice as fast.

Lions Club Minstrel Nets \$165 for Projects

Proceeds of the negro minstrel presented three weeks ago by the Hamlin Lions Club totaled about \$165, it was announced at the Tuesday noon luncheon meeting of the club. A few more tickets are to be reported, Secretary George Campbell reported.

The proceeds go to the club's project fund, including sending of President-Elect Willard Jones to Lions International convention at San Francisco, California, next week.

A pirogue is a canoe made from a log or a tree.

YOUNG SPROUT.

Grandparents Bauer had planted three young trees according to size to commemorate the births of their three grandchildren, Andrew, Heidi and Pamela.

Two of the young saplings sprouted leaves sooner than the smallest one. The older children planted the trees.

One day Heidi, six, awoke early and ran into the garden. Rushing back, she shouted excitedly, "Mommy, Daddy, Pamela has leaves!"

VISITS IN ARIZONA.

Mrs. Earl Johnson left Friday for Prescott, Arizona, where she is visiting with her brother, Ralph Gillis, and family.

Quick Dessert Treat Made Very Simply

Make a dessert treat by filling a baked nine-inch pie shell (either pastry or graham cracker) with a quart of vanilla ice cream. Top with minted pineapple sauce.

To make sauce, combine one (nine-ounce) can of pineapple tidbits, one-half cup light corn syrup, one-fourth teaspoon of mint extract and two drops of green food coloring. Blend well. Chill. Makes one and one-half cups of sauce.

The Cathedral of St. John the Divine in New York City and begun in 1892 but is not yet completed.

MODERN YOUNGSTER.

A little boy, on his way to kindergarten, tripped and fell on the sidewalk.

A kind, old lady, who had seen him fall, quickly rushed over to help him.

"No, there, little man, you must be a brave little fellow and not cry."

"Cry, my foot?" the boy shouted. "My name is Bembridge. We'll sue!"

ATTENDING TECH.

Jay Cunningham and George Huling, graduates of Hamlin High School last month, last week enrolled for the summer semester at Texas Technological College at Lubbock.

Using Caution in Lifting May Avoid Serious and Painful Injuries to Back

Paper clips and putting around a yard have something in common—they both can cause back injuries.

It's often an apparently harmless object that is an injury deal—wet leaves on a sidewalk or paper clips on an office floor, according to the National Safety Council.

And, of course, back injuries also are caused by lifting objects that are too heavy, the council pointed out.

With the advent now of warm weather, the council noted, many men (and women, too) who practice job safety throw caution to the winds when they do yard work or repair projects at home. "Oh, my aching back!"

How can a person tell if a load's too heavy for him? The council said these points should be considered:

1. How is the lifter built—slight or sturdy?
2. What type of work is he used to?
3. Is the load bulky or compact?

"A back injury, whether it's suf-

Former Stonewall Commissioner Passes at Hamlin

Several Hamlin area people Sunday afternoon attended funeral rites for E. Galloway, 62-year-old former county commissioner and resident for 49 years of Stonewall, who died early Saturday morning in the Hamlin Memorial Hospital following an illness of several months.

Funeral was held Sunday afternoon at the Aspermont First Baptist Church with Rev. Frank Foster, pastor, officiating, assisted by Rev. Wodrow McHugh, pastor of North Central Avenue Baptist Church of Hamlin.

Burial was in Aspermont Cemetery under direction of Springer Funeral Home. Pallbearers were J. T. Anderson, Earl Roddy, W. E. Driver, F. M. Perry, J. B. Lee and M. L. Jones.

Honorary pallbearers were B. O. Hawkins, Evie Gholston, Bryan Metcalf, R. O. Gibson, E. F. Jones and A. G. Jones.

Galloway was born at Murray, Kentucky, February 22, 1895. He had farmed at Aspermont prior to retirement, and was county commissioner from 1943 to 1948. He was a member of Johnson Chapel Baptist Church, west of Aspermont.

Survivors include his wife, Mrs. Zona Galloway; four sons, Howard Galloway of Lubbock, Dero, Victor and Zearl Galloway, all of Aspermont; one daughter, Mrs. Thelma Klutin of Aspermont; six sisters, Mrs. Gertie Lay of Bakersfield, California; Mrs. L. M. Reese of Aspermont; Mrs. George Gillespie of Peacock; Mrs. Joe Lawrence of Odessa; Mrs. Dutch Horton of Spur and Mrs. C. E. Branner of Abilene; three brothers, Oscar Galloway of Aspermont, Virgil Galloway of Ranger and Athel Galloway of Peacock; six grandchildren and two great-grandchildren.

FAMILY EARLY RISER.

Sandra, four, had never seen her father set the alarm clock.

"Daddy," she asked one day, after having thought it over for some time, "who is it that comes and rings our front doorbell every morning when it's time to get up?"

STORY OF IDEAS.

Only the wise possess ideas; the greater part of mankind are possessed by them.—Samuel T. Coleridge.

ferred from lifting a heavy object improperly or from slipping, is painful—and often costly," the council said.

"Best for Less"

Johnson Grass, Now prolific, May be Used at Profit

llowing the recent abundant growth in the territory, Johnson grass has abounded in many areas. Johnson grass is a forage crop or a weed, depending on where it occurs. It can be undesirable anywhere under certain field conditions, but farmers in adapted areas may well sing its praises if they are willing to tolerate certain peculiarities.

Johnson grass can be a good quality hay or grazing crop, according to recent data from the Denton agricultural experiment station. When used as hay it should be harvested in the boot stage, says Extension Agronomist E. M. Trew. Properly harvested, Johnson grass is as nutritious as Sudan and has comparable quality.

One or two hay crops per season can normally be harvested from Johnson, he says, with yields ranging from one to three tons per acre.

Although condemned by some, Trew says Johnson grass is definitely valuable as a pasture if properly managed. It can be profitably grown with such winter legumes as sweet clover or burr clover. There is some danger, as in all sorghums and sorghum grasses, of prussic acid poisoning if the crop is grazed while resuming normal growth after drought or frost retardation. Usually the plant contains only small quantities of the acid, however, and few livestock are poisoned by it.

Improved Johnson grass, sorghum-Johnson grass and perennial sweet Sudan grass in 40-inch rows at Denton averaged 5,840 pounds of hay per acre—over 900 pounds above similar crops in 12-inch rows. Over-crowding the plants reduces production materially, Trew warns.

Johnson grass does have a profitable place in certain agricultural situations. Given a proper chance this "weed" can pay handsome dividends.

RIGHT SPOT FOR HIM.

The freshman's father paid his son a surprise visit. Arriving at 1:00 a. m., he banged on the door of the fraternity house.

A voice from the second floor yelled, "Whatdya want?"

The father answered, "Does Joe Jones live here?"

"Yeah," answered the voice, "bring him in."

**WHY
re-enlist in
the small-
car army?**

**READ THIS
STARTLING FACT**

**5 out of 10 Smaller Cars
wear a Pontiac Price Tag
—yet none gives you Any
of Pontiac's Advantages**

PONTIAC GIVES YOU UP TO 8.9% MORE SOLID CAR PER DOLLAR!

Not one of the smaller cars can give you the heavy-duty construction, the road-hugging heft and solid security that surround you in every Pontiac. Yet Pontiac's the nimblest heavyweight you ever managed—and your Pontiac dealer can show you more than six dozen advanced-engineering reasons why! Pontiac has gone all out to make this genuine big car the best-behaved beauty that you ever had the pleasure of bossing. You'll find Pontiac's exclusive Precision-Touch Controls make steering and braking the surest, easiest you've ever experienced! Park it, cruise it, try it in stop-and-go traffic . . . this is driving the smaller cars can't duplicate!

PONTIAC GIVES YOU 4 TO 7 INCHES MORE WHEELBASE!

The small cars extend bumpers and fenders to look big—but Pontiac puts the extra length where it counts—between the wheels! Pontiac's longer stride brackets the bumps instead of riding on them. And this extra length shows up inside, too, in stretch-out space for six footers. Add to Pontiac's bonus in length its all-new suspension system and you have an exclusive Level-Line Ride no car at any price can surpass . . . and a built-in sense of direction and security that will spoil you for the smaller cars forever!

PONTIAC'S PERFORMANCE TOPS THE BEST THE SMALL CARS CAN OFFER—BY A WIDE MARGIN!

Not one of the smaller cars can measure up to Pontiac Performance. Whether you judge a power plant by engineering statistics or on-the-road performance, Pontiac's Strato-Streak V-8 stands head and shoulders above anything in the low-price field. Your Pontiac dealer will be happy to show you a complete facts-and-figures comparison—then an eye-opening test drive in traffic or out on the highway will supply all the heart-lifting proof you need that Pontiac has separated the men from the boys when it comes to performance!

—AND PONTIAC HAS ALWAYS BEEN FAMOUS AS ONE OF AMERICA'S TOP TRADE-INS!

Maybe it comes as a surprise to you that so much more car can be yours at the same price you've seen on the smaller cars. But there's the fact! And Pontiac is a wonderful investment, too! As you know, it has always commanded a top trade-in. So why not step out of the small-car class and into a Pontiac . . . there's nothing in your way. Your Pontiac dealer has the keys and an eye-opening offer waiting for you right now!

So why not look and feel like a million—instead of a million others?

NOW! If you want the ultimate in both economy and extraordinary performance, now Tri-Power Carburetion is available at extra cost on even the lowest priced Pontiac model! It's America's newest power advance and exclusively Pontiac's at so low a cost!

Controlled Radiation Is Great Boon To Treatment of Diseases, Says SHD

Considerable anxiety has been felt in the Hamlin territory as well as over all the country in recent weeks over conflicting reports about the effects of radioactive elements.

Last month an Austin State Hospital physician called the State Health Department to report that a radium needle, being used to treat a patient with skin cancer, had been dislodged or lost.

Did the department have radiation detection equipment with which the needle might be located? The department did, and the needle was subsequently found in a gauze bandage.

This incident, one of many that take place every month, illustrates the manner in which the department's division of occupational health, working in cooperation with private physicians and other agencies, is quietly going about the task of protecting citizens from the dangers of excessive radiation exposures.

A great deal has been said in recent months about the imminent peril the entire nation is facing from excessive radiation. Much of that information has been true in general, but some of it has been misconstrued to the point where people have canceled much needed x-ray treatments or examinations.

RECEIVES HONORARY DEGREE — Mr. and Mrs. H. J. Lutcher Stark of Orange look at an honorary degree given to Mrs. Stark by Texas State College for Women. Mrs. Stark is the first person ever to receive an honorary degree from the college. Mrs. Stark, a graduate of the school and a member of the Board of Regents, was awarded a Doctor of Laws degree for "singularly and exceptionally high civic and humanitarian achievements."

have made considerable investments of money to insure the proper control of radiant energy equipment.

And as a sort of clincher, the State Department of Health of Texas is one of five states which has complete regulations regarding the registration and proper use of all radiation producing equipment and materials.

So, while it is true that ever increasing uses of radiant energy in national defense, medicine and industry does demand that we exercise every precaution, that caution must be tempered with common sense. Radiation in controlled amounts can be more beneficial than hazardous.

Industry need not wish.—Benjamin Franklin.

Dividends Decline For Stockholders of Celotex Corporation

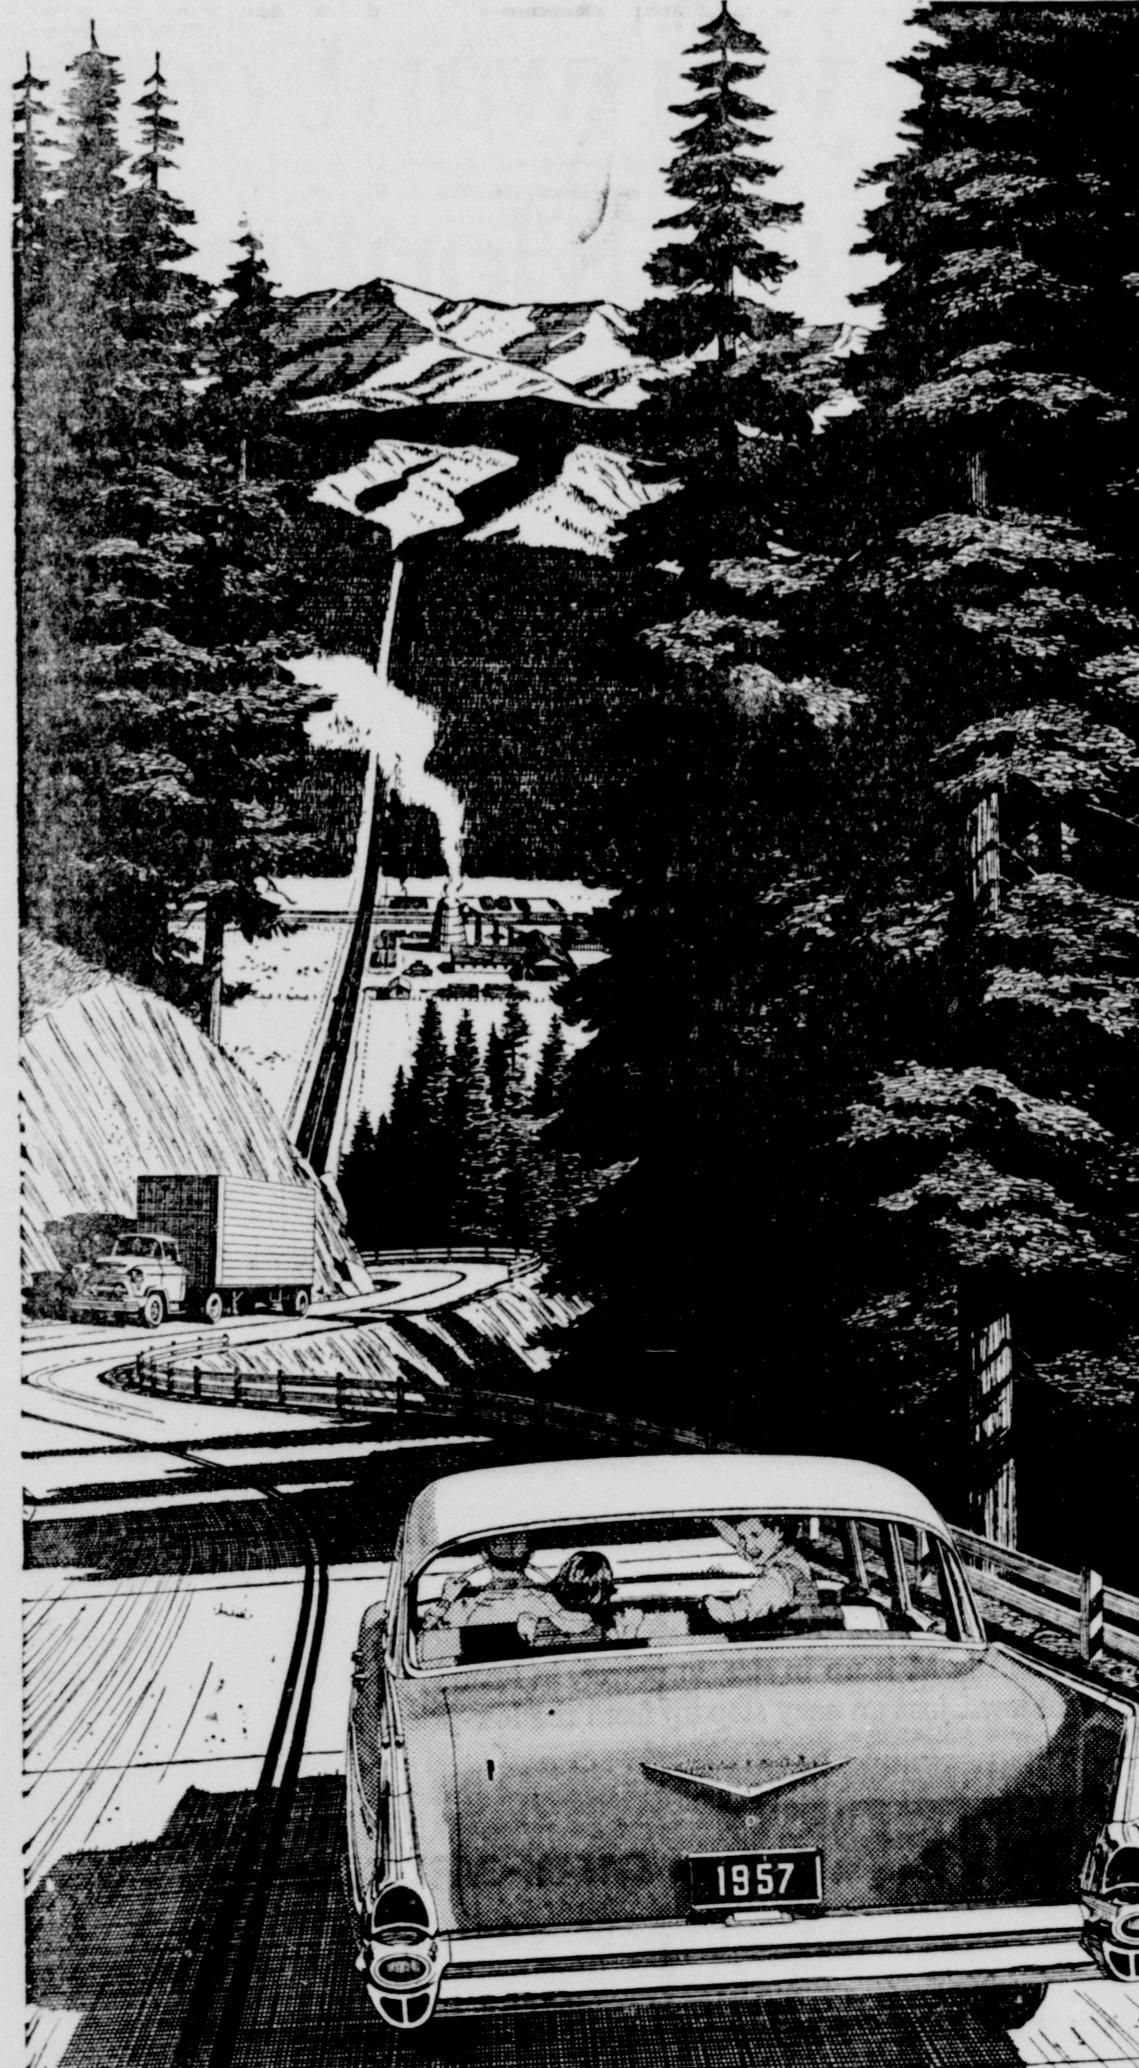

The Celotex Corporation this week reported net earnings of \$1,595,647 after all charges and income tax provisions in the six months ended April 30, according to a release to The Herald from the Chicago office of the concern.

After preferred dividend requirements of \$128,431, the earnings amounted to \$1.66 a share on 878,651 shares of common stock outstanding. This compares with earnings of \$2,695,598 in the corresponding six months last year, equivalent to \$2.92 per share of common stock on the same number of shares outstanding.

H. W. Collins, president, sales, including those of the Hamlin plant, totaled \$30,766,827 compared with \$36,334,578 in the like period a year ago.

The Palace of the League of Nations in Geneva was completed in 1936.

County 4-H Club Youths Win Trip To State Session

Six Jones County 4-H Club boys and girls won the junior leadership contest of District III, according to Bill Lehmburg, county agent, and Mary Y. Newbern, home demonstration agent. The boys and girls who will be awarded an expense paid trip to Bastrop to the Texas 4-H Junior Leadership Laboratory are: John Bill Oman of Ericksdahl, Jimmy Roberts and Johnny Mitchell of Anson; Patsy Wade of Anson, Nancy Hunter and Karen Irvin of Noo-

ble.

The laboratory will be held at Bastrop State Park on August 25 through 31.

Purpose of this 4-H Club junior leadership training program is to encourage older 4-H Club members to develop those leadership qualities that are essential to progress and wholesome community life; to hold the interest of older club members; to produce leaders from the ranks of club members; to provide leadership assistance to adult leaders and agents; and to develop opportunities for service and helpfulness to others.

The agents will accompany the group to Bastrop.

New Methodist Pastor Speaks at Lions Luncheon

"The Church: Its Place in Our Lives" was the topic of a talk by Rev. Edmund W. Robb, new pastor of the First Methodist Church, when he spoke at the Tuesday noon luncheon meeting of the Hamlin Lions Club at the oil mill guest house.

The newcomer to town spun an array of yarns, then got down to the serious side of his subject. He was presented by Ted Russell.

"The church has been responsible for many of the present day reforms," Robb declared. "He then went on to point out that the church had been the chief factor through the centuries that fought for freedom, and it continues to be the guardian of that freedom. It has sponsored free education, he said, pointing to the earliest universities of this country that were founded by the church. The church has raised the economic standards of people, and is responsible for community progress through the years."

Mrs. J. C. McCarley Buried at Hamlin Last Wednesday

Funeral services for Mrs. J. C. (Uriella) McCarley, sister of Mrs. Mrs. S. D. McMahon, were conducted last Wednesday afternoon at the First Baptist Church in Hamlin. Officiating were Rev. Calvin Bailey, pastor, and Rev. Tom Brandon, pastor of the Wichita Street Baptist Church in Fort Worth, home church of Mrs. McCarley.

Mrs. McCarley, who was 88 years of age, died last Tuesday morning at the home of a daughter.

Climaxing his remarks with a plea for support by its members, he urged his hearers to give their allegiance, loyalty, attendance and support to the church of their choice.

It was announced that installation of new officers for the club year beginning July 1 will be conducted at next Tuesday's Lions Club meeting, with Deputy District Governor B. V. Newberry officiating.

The big things you want cost less in a Mercury Monterey!

YOU HAVE TO PAY OVER \$88 MORE to get a 4-barrel carburetor as standard equipment in any competitive car. And Mercury's Thermo-Matic Carburetor is the only one that controls the temperature of the air the engine breathes.

YOU HAVE TO PAY OVER \$130 MORE to match the Monterey's brake size in any other car. The Monterey actually has bigger brakes than most of the highest priced cars!

YOU HAVE TO PAY OVER \$150 MORE to match Mercury's standard 255 horsepower in any competitive car. And the Monterey's optional engine offers a blazing 335 horsepower!

YOU HAVE TO PAY OVER \$200 MORE to get any other car with real dual headlamps. No other car at the Monterey's price even offers duals. You can get Quadri-Beam headlamps, a true 4-beam system, on all 19 Mercury models.

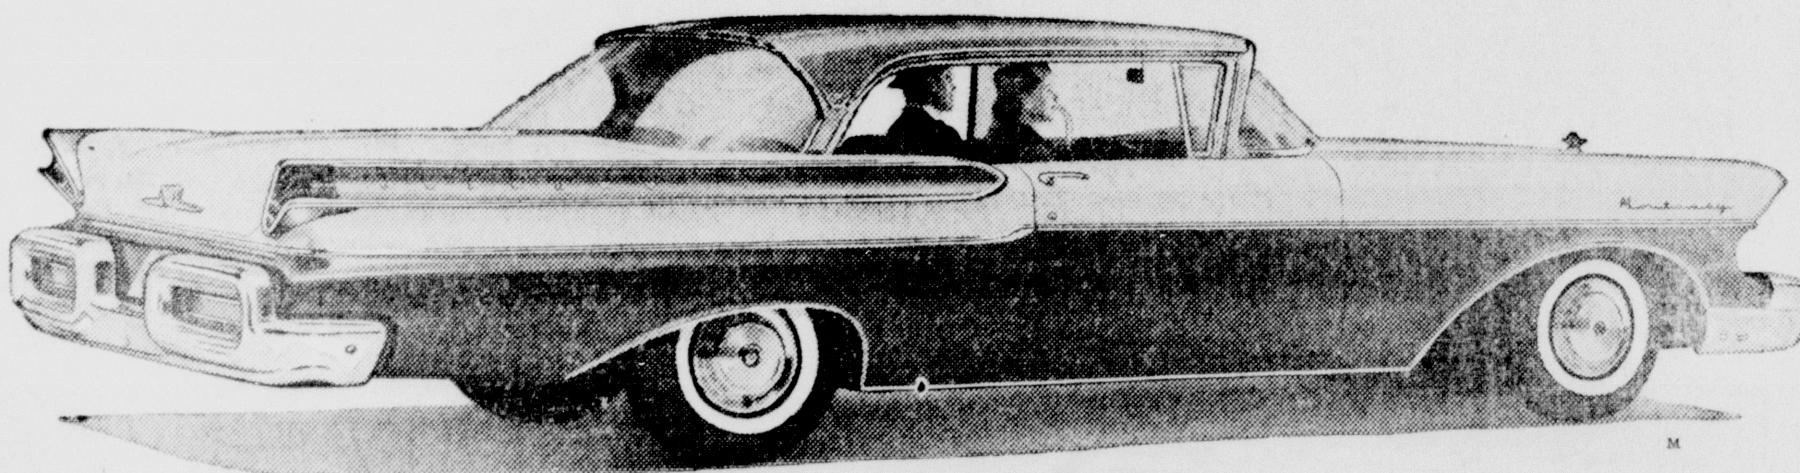

YOU HAVE TO PAY OVER \$500 MORE to match the Monterey's standard compression in any competitive car. Its compression ratio of 9.75 to 1 is close to the highest you can get in any car.

YOU HAVE TO PAY OVER \$1,000 MORE to match The Big M Monterey's hip room and rear seat leg room. Mercury has the biggest size increase in the industry—bigger in every important dimension!

YOU HAVE TO PAY OVER \$2,000 MORE to match Mercury's width in any other car. You can match it only in America's three costliest cars!

And no other car at any price offers you Mercury's exclusive Floating Ride and Dream-Car Design. Stop in today. Let us show you all the reasons why the Mercury Monterey is the easiest big car to drive, to ride in, to look at, and to buy.

The price comparisons stated are based on factory suggested retail delivered prices.

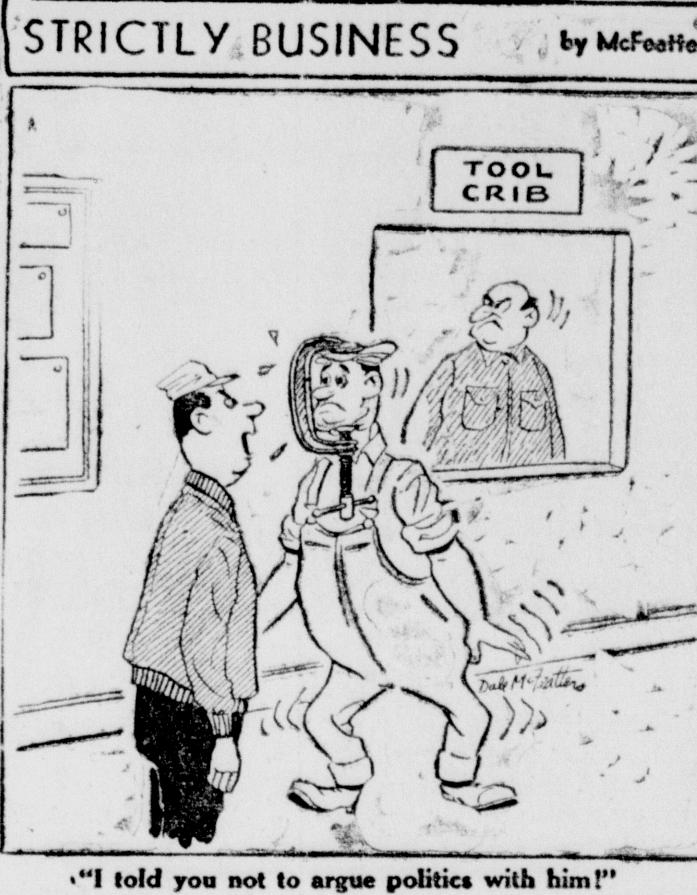

BIGGEST VALUE INCREASE IN THE INDUSTRY! The Big M is up in size, in power, in luxury, in everything that counts in a car. But the price is still low—just an easy step up from the low-priced three.

IT'S THE LAW IN TEXAS

A Public Service Feature of the State Bar of Texas
(This column is based on Texas law. It is written to inform—not to advise. No person should ever apply or interpret any law without the aid of an attorney who knows the facts, because the facts may change the application of the law.)

YOUR CHILD AND THE DOCTOR

It's a good idea to give written consent for necessary medical care if your child leaves home for a visit or a camping trip, or if you plan to be away for any length of time.

For example, a summer camp nurse may bring a boy into a hospital with an acute case of appendicitis. But the doctor may well hesitate to go ahead and operate without the parents' consent.

Is the doctor arbitrary, and is such permission just a legal technicality? No, he is well within his rights, though he may give first aid—but only for emergency treatment where a child's health or life may be at stake. He is likely to put off follow-up care until he can reach the child's parents. A relative or baby sitter generally cannot grant consent for a child's treatment.

Even an adult must request treatment and grant consent to medical care on his own before a doctor can give it to him. Children cannot do this.

By going to your doctor you show your willingness and consent to accept his treatment. Your consent is assumed also when you ask for a house call by the doctor, or if as a result of an accident you come to a hospital for emergency treatment. If you are unconscious, the doctor may well give you emergency care, yet later he should get your consent to further treatment.

Minors cannot consent to medical treatment, and except in dire emergencies their parents or guardians must give it for them.

The consent should not be broadly or loosely phrased, but should be as specific as circumstances permit.

The principal reason for having the consent in writing is to avoid later misunderstandings. It is a protection both to the patient and physician.

FATHER OF YEAR—Ira Irving Isbell, 73-year-old retired school teacher who has taught 5,000 students and lives in Fort Worth, has been selected as Texas Baptist Father of the Year. The veteran school master, who spent 37 years in classrooms and has taught Sunday school classes for 45 years, is now crossing patrolman and tutors high school students.

Hamlin's Finest Department Store

ROUTHS HAVE GUESTS.

Mrs. W. E. Brown and daughter, Sarah Lou and Betsy, of Midland visited her parents, Mr. and Mrs. Tom Routh. Other visitors in the Routh home recently were Mr. and Mrs. H. L. Rothell of San Francisco, California. Mr. Rothell is a brother of Mrs. Routh.

ANOTHER GAMBLER.

There's the touching story of a bragging young man who said to his girl: "I bet you wouldn't marry me!"

As it turned out, she not only called his bet, but raised him five.

Footings Run on First Baptist Church Plant

Concrete footings for the foundation of the new \$60,000 educational building of the First Baptist Church have been run by the contractor on the job, which has been slowed by wet weather.

Real showings on the new structure are scheduled to be made soon, declares a representative of the contracting firm of Colorado City.

The Washington Monument in Washington, D. C., is 555 feet high.
